Autoimmunity and Autoimmune Disease David Evered, Julie Whelan, 1987

This work focuses on the autoimmune processes that have now been proven to underlie a number of serious diseases, including diabetes mellitus, rheumatoid arthritis and multiple sclerosis. Papers explore the rapidly expanding developments in research on immune response and regulation and their potential in the development of treatments for autoimmune diseases. The wide range of subjects covered here include the nature of intracellular and cell surface derived self antigens, competing theories of

the generation of immune tolerance and their implications of current theories for research and treatment possible links between autoimmunity and genetic complement deficiency the contributions of interferons and class II HLA antigen expression to autoimmunity and the potential of monoclonal antibodies and other biotechnological advances in treating human autoimmune conditions The Skin in Systemic Autoimmune Diseases Piercarlo Sarzi-Puttini, 2006-01-26 This book represents the state of the art in the field of skin and autoimmune rheumatic diseases It covers systematically a growing and multifaceted topic which is of great importance in the clinical practice It also serves as a sharp educational tool as each chapter provides summaries and specific highlights to key references cited into the text The pathophysiological link between skin involvement and autoimmunity has been explained in detail as well as diagnostic and therapeutic aspects This book yields an impressive body of well ordered information which summarizes the experience of a selected panel of distinguished physicians and scientists actively involved in the field of skin immunology and systemic autoimmunity Written by a respected panel of distinguished physician scientists actively involved in the field of skin immunology and systemic autoimmunity Box summaries at the end of each chapter highlight important topics Up to date basic knowledge as well as modern approach to diagnosis and therapy Immunointervention in Autoimmunity by Th1/Th2 Regulation Luciano Adorini, 1997 Vascular Inflammation in Systemic Autoimmunity Giuseppe A. Ramirez, Cornelia Weyand, Augusto Vaglio, Angelo A.

Manfredi, 2017-01-16 Plasticity and dynamism characterize the immune system as a tissue integrating network with defensive functions Blood and lymphatic vessel trees constitute the most evident and intuitive physical platform for the development of the net of interactions between immune cells body tissues and foreign agents Moreover vessel repair and immune patrolling are intimately linked physiological functions with common evolutionary roots Not surprisingly variable degrees of vascular inflammation are often detectable in the setting of systemic inflammation and autoimmunity whereas research in the field of cardiovascular pathology is progressively converging towards the identification of a common inflammatory background The definition of the role of vascular inflammation in causing sustaining and or predicting the development of systemic autoimmunity constitute a challenging unexplored frontier towards the development of a new generation of treatments and a better patient care Pregnancy, Autoimmunity, and Connective Tissue Disorders J. S. Scott, Howard Anthony Bird, 1990 In this book an international team of medical experts examines the important relationship between pregnancy and rheumatic diseases The first section reviews fundamental concepts and recent research including the immunology of pregnancy and hormonal and epidemiological aspects of rheumatic diseases Additional chapters focus on such specific diseases as systemic lupus erythematosus systemic sclerosis rheumatoid arthritis and seronegative spondarthritis Other topics include anticardiolipin antibodies and their relation to thrombosis and fetal loss and hereditary abnormalities of collagen and their impact upon pregnancy Other organ specific autoimmune diseases are also covered Combining elements of basic pathology and clinical practice this comprehensive text also features chapters on drug treatment infertility and rehabilitation providing
