**Navigating the Complexity Across the Peace-Sustainability-Climate Security Nexus** Bernard Amadei,2023-11-28 Promoting peace and sustainability in human development while accounting for the risks associated with the impact of climate change on society has become more imperative than ever when addressing humanity s challenges of the twenty first century There is enough evidence that peace sustainability and climate security are entangled with multiple complex interactions and cannot be dealt with in isolation and independently from the environment and the numerous

systems with which they interact Yet the intersection of peace sustainability and climate security or their opposites i e conflict unsustainability and climate vulnerability is rarely articulated with a systemic mindset A multi solving nexus approach is more appropriate to capture the complexity and uncertainty of how the three sectors of peace sustainability and climate security play a role in community development the nature of their causal chains and the feedback on how community development affects the three sectors Navigating the Complexity Across the Peace Sustainability Climate Security Nexus explores the value proposition of using a systems approach methodology and tools to comprehend and model that dynamic Features of the book Explores the interaction between the different components of peace and the relationship between peace sustainability and climate security using semi qualitative and quantitative tools Explains how climate adaptation and mitigation are related to peace or conflict Presents generic system dynamics modeling that can be used in different contexts

**Innovation in Systems Thinking** Bojan Rosi, 2015 Problem solving is an important part of our lives Dialectical Networking Thinking DNT is a soft systems methodology aimed at complex problem solving The modern dynamic business is a demanding and complex process It requires permanent learning innovating and adapting to the requirements of demanding customers The latter must be able to face their challenges and change themselves accordingly first of all by innovating their own values and knowledge especially concerning holistic complex problem solving in business DNT enables us to do this A key issue namely keeps surfacing what is the correct way to tackle mastering and solving complex problems in order for objectives and solutions to be high quality and sustained In daily practices unfortunately one tends to underestimate the complexity of problems one faces and tries to solve them wrongly and irresponsibly one sidedly This approach causes new problems to emerge perhaps even more intricate ones This problem can be avoided by using DNT following the steps briefed above DNT can enjoy evolution to help solve complex problems if all preconditions are met for its application They include along with knowledge and motivated teams an innovation seeking organization and its prevailing culture In the best case scenario every OBS member would accept DNT because such a capacity provides the upper hand in modern competition On the other hand limitation to single disciplines lack of co operation on an interdisciplinary basis and in teamwork will unavoidably fail in the modern innovative economy
