Vankka,2005-07-22 The approach adopted in Digital Synthesizers and Transmitters for Software Radio will provide an
understanding of key areas in the field of digital synthesizers and transmitters It is easy to include different digital
techniques in the digital synthesizers and transmitters by using digital signal processing methods because the signal is in
digital form By programming the digital synthesizers and transmitters adaptive channel bandwidths modulation formats
frequency hopping and data rates are easily achieved Techniques such as digital predistortion for power amplifier

functionality is implemented through programmable signal processing devices giving the radio the ability to change its
operating parameters to accommodate new features and capabilities A software radio approach reduces the content of radio
