*Tag Questions in Conversation* Ditte Kims, 2018-05-15 This monograph deals with variable tag questions. These are utterances with a variable interrogative tag like It's peculiar writing isn't it and the semi variable tag innit such as Nice innit. The aim is to provide a corpus based comprehensive semantic pragmatic typology of British English tag questions. Compared to existing descriptions the proposed typology is novel in three ways. Firstly whereas almost all existing typologies are single layered classifications the functions of tag questions are categorized into two parallel dimensions of interpersonal meaning the speech function and the stance layer. Secondly semantic generalizations are proposed for clusters of grammatical intonational and conversational properties. Thirdly the bottom up description is based on a sizeable amount of authentic spontaneous conversations which are analysed both qualitatively and quantitatively.

[The Wildlife Techniques Manual](#)  
Nova J. Silvy, 2020-07-28 The 1 selling wildlife management book for 40 years now updated for the next generation of professionals and students. Since its original publication in 1960 The Wildlife Techniques Manual has remained the cornerstone text for the professional wildlife biologist. Now fully revised and updated this eighth edition promises to be the most comprehensive resource on wildlife biology conservation and management for years to come. Superbly edited by Nova J. Silvy and published in association with The Wildlife Society the 50 authoritative chapters included in this work provide a full synthesis of methods used in the field and laboratory. Chapter authors all leading wildlife professionals explain and critique traditional and new methodologies and offer thorough discussions of a wide range of relevant topics. To effectively incorporate the explosion of new information in the wildlife profession this latest edition is logically organized into a 2 volume set. Volume 1 is devoted to research techniques and Volume 2 focuses on pragmatic management methodologies. Volume 1 describes research design and proper analytic methods prior to conducting research as well as methods and considerations for capturing and handling wild animals and information on identification and marking of captured animals. It also includes new chapters on nutritional research and field sign identification and on emerging topics including structured decision making. Finally Volume 1 addresses measurements of wildlife abundance and habitat and research on individual animals. Volume 2 begins with a section on the relationship between research and management including public outreach described in a context that encourages engagement prior to initiation of management. An adaptive management approach is described as a cornerstone of natural resource management followed by a section on managing landscapes and wildlife populations. The volume also includes new chapters on ethics in wildlife science and conservation conflict resolution and management and land reclamation. A standard text in a variety of courses the Techniques Manual as it is commonly called covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages. This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource one that professionals and students in wildlife biology conservation and management simply cannot
