Ginzburg,1964    *Arthur's Invariant Trace Formula and Comparison of Inner Forms* Yuval Z. Flicker,2016-09-14 This monograph provides an accessible and comprehensive introduction to James Arthur's invariant trace formula a crucial tool in the theory of automorphic representations. It synthesizes two decades of Arthur's research and writing into one volume treating a highly detailed and often difficult subject in a clearer and more uniform manner without sacrificing any technical details. The book begins with a brief overview of Arthur's work and a proof of the correspondence between  $GL_n$  and its inner forms in general. Subsequent chapters develop the invariant trace formula in a form fit for applications starting with Arthur's proof of the basic non-invariant trace formula followed by a study of the non-invariance of the terms in the basic trace formula and finally an in-depth look at the development of the invariant formula. The final chapter illustrates the use of the formula by comparing it for  $G$   $GL_n$  and its inner form  $G$  and for functions with matching orbital integrals.
