Robertson,W.J. Tango,2013-12-01 The 1990s are proving to be a very exciting period for high angular resolution astronomy At radio wavelengths a combination of new array instruments and powerful imaging algorithms have generated images of unprecedented resolution and quality In the optical and infrared the great technical difficulties associated with constructing separated aperture interferometers have been largely overcome and many new instruments are now operating or are being developed As these programs start to produce observational results they will be able to draw extensively on the experience gained by the radio interferometry community Thus it seemed that the time was ripe for a meeting which would bring together workers from all wavelength ranges to discuss the details of the science and art of Very High Angular Resolution Imaging While the main emphasis of Symposium No 158 was on high resolution techniques from the radio mm wave infrared and optical bands it also provided an opportunity for presentation of astronomical results from these techniques As well as giving our colleagues from the Northern Hemisphere a break from midwinter the location of the Symposium in Australia recognised the continuing development of astronomical interferometry in this country especially the recent completion of the Australia Telescope radio array and the progress toward commissioning of the Sydney University Stellar Interferometer A number of the participants visited these instruments during the post symposium tour **The Interstellar Age (The Complete Trilogy)** Valmore Daniels,2014-10-06 Forbidden the Stars At the end of the 21st century a catastrophic accident in the asteroid belt has left two surveyors dead There is no trace of their young son Alex Manez or of the asteroid itself On the outer edge of the solar system the first manned mission to Pluto led by the youngest female astronaut in NASA history has led to an historic discovery there is a marker left there by an alien race for humankind to find We are not alone While studying the alien marker it begins to react Four hours later the missing asteroid appears in a Plutonian orbit along with young Alex Manez who has developed some alarming side effects from his exposure to the kinetic element they call Kinemet From the depths of a criminal empire based on Luna an expatriate seizes the opportunity to wrest control of outer space and takes swift action The secret to faster than light speed is up for grabs and the race for interstellar space begins Music of the Spheres The technology for interstellar flight exists through the power of Kinemet but the key to unlocking its code lies in a

thousand year old scroll left on Earth by an alien species When the ancient manual is stolen before a full translation is completed Alex Michael and Justine scramble to recover it Along the way they stumble on an interplanetary conspiracy and uncover a secret that shatters their view of life and shakes the very foundations of our existence Worlds Away For a thousand years the Kulsat Armada has ravaged the galaxy searching for the lost legacy of an extinct race of technologically advanced beings They destroy anyone who gets in their way Now they have turned their attention to Earth and are gathering their forces for an invasion Justine Michael and Alex each hold a key to stopping the enemy but they are worlds away from each other and they are running out of time
