The Arabs and the Stars Paul Kunitzsch,2017-05-15 The influence of Arabic Islamic science on European astronomy is still evident in the number of terms and star names which derive from the Arabic These articles examine what the Arabs and other peoples of the Islamic world knew about the fixed stars and the constellations and the astrological traditions they associated with them Professor Kunitzsch shows how the early folk astronomy of the Arabs was radically altered without being swept away by the discovery of ancient Greek also Indian and Persian sources by far the most important of these was the Almagest of Ptolemy This knowledge was then transmitted to medieval Europe to Byzantium and especially to Spain as the articles go on to describe and was a vital factor in stimulating the development of scientific thought in the West **The Secret Zodiac** Fred Gettings,2025-12-01 In the Florentine basilica of San Miniato al Monte is a thirteenth century marble zodiac Over many years Fred Gettings unravelled the mysteries of its construction In this book originally published in 1987 he shows that the church was designed according to an extraordinarily significant astrological schema and embodies the mediaeval Church s desire to refute an influential contemporary prophecy of the coming of the Anti Christ The Secret Zodiac shows how all the occult devices of the mediaeval artist are employed in San Miniato from a ray of light which falls twice a year upon a particular symbol to a message concealed in code in a Latin inscription set near to the zodiac itself The author uncovers and explains the importance of all these arcane symbols and relates each to the general and occult philosophy of the time He concludes that San Miniato is probably the last surviving church to have been designed by initiates with a profound and explicit knowledge of astrology and hermetic lore The book will be of interest to art historians occultists hereticists and mediaeval historians **Star Names** Richard Hinckley Allen,1963 **Astronomy and Astrophysics** ,1884

How can you prepare for your stay beneath the stars? What astronomy can you do during the daytime? What kind of equipment will you need? Questions such as these are answered and if town dwellers return inspired and Bob hopes also inspired to look with fresh eyes at their own local lighting there is enough information here for them to equip themselves for some urban astronomy too. *A Dictionary of Modern Star Names* Paul Kunitzsch, Tim Smart, 2006.
