Sanchez-Andres,2006-12-08 This book constitutes together with its compaignion LNCS 1607 the refereed proceedings of the International Work Conference on Artificial and Natural Neural Networks IWANN 99 held in Alicante Spain in June 1999 The 89 revised papers presented were carefully reviewed and selected for inclusion in the book This volume is devoted to foundational issues of neural computation and tools for neural modeling The papers are organized in parts on neural modeling biophysical and structural models plasticity phenomena maturing learning and memory and artificial intelligence and cognitive neuroscience      The Sun We Share Kristine Larsen,2024-11-21 As the dominant star in our sky the Sun has been alternately worshipped as a god and viewed as a threat over the course of human history Despite significant advances in astronomy the Sun continues to surprise us most notably in its production of so called space weather that impacts technology here on Earth This unique mixture of familiarity and mystery has made the Sun a main character in popular media over the past three centuries This book examines how popular media have adapted to our ever changing understanding of the inner workings of the Sun It provides a valuable way to observe the inherent problems of communicating science to a non technical audience Chapters cut through the widespread hype found on the Internet and instead explore our ever improving scientific exploration of the Sun the persistent misconceptions surrounding it the fate of the Sun and its relation to the fate of the Earth and why despite comments to the contrary by Oscar Wilde the average person should care about sunspots      Modeling for Prediction of Radiation-Induced Toxicity to Improve Therapeutic Ratio in the Modern Radiation Therapy Era Ester Orlandi,Tiziana Rancati,Giuseppe Sanguineti,Claudio Fiorino,Riccardo Valdagni,2021-07-27      **Aphasiology** Patrick Doyle,2002-05-02 The First Annual Clinical Aphasiology Conference CAC was convened in Albuquerque in 1971 It was attended by a small group of primarily practicing clinicians dedicated to meeting the human service needs of their clients while recognizing the importance of contributing to the collective knowledge base of their discipline by providing empirical evidence supporting the links between their clinical interventions and outcomes Thirteen years later Barlow Hays and Nelson 1984 would describe in their now seminal publication The Scientist Practitioner an integrated model of applied behavioral research its strategies and methods and the role of the practitioner in the acquisition of knowledge directed toward improving clinical procedures and outcomes By this time 13 Volumes of CAC

publications had already been published and comprised the single largest source of applied clinical data addressing the nature of aphasia and its clinical management. These documents represented the product of the scientist practitioner model in action prior to its formalization by Barlow et al and provide a rich source of evidence supporting the efficacy of aphasia rehabilitation. Unfortunately these and subsequent CAC publications remain unavailable to the larger clinical and scientific community due to their limited distribution. Much has changed in the ensuing years. Indeed many of the healthcare delivery systems in which aphasia rehabilitation is now practiced in 2002 severely restrict the frequency and duration of clinical services. Increasingly practitioners are required to be more accountable for their clinical outcomes and to measure behavioral change in units that represent meaningful differences to consumers. Now more than ever it is critical that the scientist practitioner model be promoted in order to better serve individuals with aphasia and to further advance the collective knowledge and evidence base of the discipline. Now more than ever the available evidence needs to be disseminated as broadly as possible. These goals are in keeping with the mission of CAC as envisioned by its founding members and remain the focused commitment of its many participants steering committee and publication board. In keeping with these goals the papers that appear in this special edition of *Aphasiology* were selected based upon their theoretical importance, clinical relevance and scientific merit from among the many platform and poster presentations comprising the 31st Annual Clinical Aphasiology Conference held in Santa Fe, New Mexico in 2001. Each paper was peer reviewed by the Editorial Consultants and Associate Editors acknowledged herein consistent with the standards of *Aphasiology* and the rigours of merit review that represent this indexed archival journal that is accessible to clinicians and scientists all over the world.

*The Metric Tide*  
James Wilsdon, 2016-01-20

Represents the culmination of an 18 month long project that aims to be the definitive review of this important topic. Accompanied by a scholarly literature review, some new analysis and a wealth of evidence and insight, the report is a tour de force, a once in a generation opportunity to take stock. Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog. A must read if you are interested in having a deeper understanding of research culture management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration. Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London. LSE Impact of Social Sciences Blog. Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic even enthusiastic about the prospect of granular real time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power, they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research

excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems Finally they consider the negative or unintended effects of metrics on various aspects of research culture Including an updated introduction from James Wilsdon the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management by funders and in the next cycle of the Research Excellence Framework The metric tide is certainly rising Unlike King Canute we have the agency and opportunity and in this book a serious body of evidence to influence how it washes through higher education and research
