Speaking In Public And Private:

City Making Gerald E. Frug, 2001-02-20 American metropolitan areas today are divided into neighborhoods of privilege and poverty often along lines of ethnicity and race City residents traveling through these neighborhoods move from feeling at home to feeling like tourists to feeling so out of place they fear for their security As Gerald Frug shows this divided and inhospitable urban landscape is not simply the result of individual choices about where to live or start a business It is the product of government policies and in particular the policies embedded in legal rules A Harvard law professor and leading expert on urban affairs Frug presents the first ever analysis of how legal rules shape modern cities and outlines a set of alternatives to bring down the walls that now keep city dwellers apart Frug begins by describing how American law treats cities as subdivisions of states and shows how this arrangement has encouraged the separation of metropolitan residents into different sometimes hostile groups He explains in clear accessible language the divisive impact of rules about zoning redevelopment land use and the organization of such city services as education and policing He pays special attention to the underlying role of anxiety about strangers the widespread desire for good schools and the pervasive fear of crime Ultimately Frug calls for replacing the current legal definition of cities with an alternative based on what he calls community building an alternative that gives cities within the same metropolitan region incentives to forge closer links with each other An incisive study of the legal roots of today's urban problems **City Making** is also an optimistic and compelling blueprint for enabling American cities once again to embrace their historic role of helping people reach an accommodation with those who live in the same geographic area no matter how dissimilar they are

Urbanism of Exception Martin J. Murray, 2017-03-10 This book challenges the conventional modernist inspired understanding of urbanization as a universal process tied to the ideal typical model of the modern metropolis with its origins in the grand Western experience of city building At the start of the twenty first century the familiar idea of the city or urbanism as we know it has experienced such profound mutations in both structure and form that the customary epistemological categories and prevailing conceptual frameworks that predominate in conventional urban theory are no longer capable of explaining the evolving patterns of city making Global urbanism has increasingly taken shape as vast distended city regions where urbanizing landscapes are increasingly fragmented into discontinuous assemblages of enclosed enclaves characterized by global connectivity and concentrated wealth on the one side and distressed zones of neglect and impoverishment on the other These emergent patterns of what might be called enclave urbanism have gone hand in hand with the new modes of urban governance where the crystallization of privatized regulatory regimes has effectively shielded wealthy enclaves from public oversight and interference

The Open Book M. Jensen, 2016-04-30 The Open Book is a provocative study of literary influence at work in English writing from Hardy to Woolf Jensen reimagines the links between text and context as she endeavors to historicize literary influence by taking Bloomian anxiety and Kristevan intertextuality into fields of actual history and biography Jensen both borrows from and deconstructs the ideas of these theorists as she reads the texts of Hardy Stephen Woolf Mansfield and Middleton Murry By doing so The Open Book offers a fresh and pragmatic opening onto the relation between personal cultural and institutional history on the one hand and literary history on the other
