**Race with the Wind** Birch Matthews, 2001 In the decades leading up to World War II air races were often the proving grounds for radical new aviation principles and designs The people and machines of air racing during this period made tremendous strides and contributed incredible new technologies aerodynamics powerplants and airframes This unique look at the key players and aircraft of the early 20th century s great air races examines and explains how innovative racing technologies found their way into future fighter and passenger aircraft Coverage of exciting races like the Schneider Trophy Pulitzer Trophy Race and the National Air Races an in depth look at their contributions to aeronautics exclusive line drawings illustrating the technologies and archival photography make this a must for air racing fans and aviation enthusiasts [Hero of the Air](#)

**William Trimble**, 2013-07-10 In this biography William F Trimble examines the pioneering work of Glenn Curtiss and his role in the origins of aviation in the U S Navy in the years up to and through World War I A self taught mechanic and inventor Curtiss was a key figure in the development of the airplane during the early part of the century and his contributions to aviation are well known This book s careful examination of his partnership with the Navy breaks new ground in revealing significant new details of his contributions Curtiss s links to the Navy came as result of aviation advocates within the Navy chief among them Captain Washington I Chambers who recognized that the Navy had special requirements for airplanes and their operations and for aviators and their training Curtiss helped meet the special requirements of the service for aircraft particularly those with the potential for operating with naval vessels at sea or in conducting long distance flights over water He also was instrumental in training the first naval aviators Curtiss and the Navy continued their collaboration through World War I reaching a climax in 1919 with the first transatlantic flight of the famed Navy Curtiss NC flying boat This book addresses the broader implications of the Curtiss Navy collaboration in the context of the longstanding trend of government private cooperation in the introduction and development of new technologies It also explores the interactive dynamics of weapons procurement and technological change within a large and entrenched bureaucracy and helps lay to rest the persistent myth that the Navy resisted the introduction of aviation

**Reinventing the Propeller** Jeremy R. Kinney, 2017-03-24 This book explores a technology that transformed airplanes into safe practical tools of war and a means of transportation during the first half of the twentieth century [Billy Mitchell's War with the Navy](#)

**Thomas Wildenberg**, 2014-02-15 In the years following WWI the U S Congress was more interested in disarmament than in funding national defense For the military services this meant lean budgets and skeleton operating forces Billy Mitchell s War recounts the struggle between the Army and Navy air arms for the resources needed to define and establish the role of aviation within their respective services in the period between the two world wars When Billy Mitchell returned from WW I he brought with him the deep seated belief that air power had made armies and navies obsolete When Congress rejected the concept of a unified air service in 1920 Mitchell and his supporters turned on the Navy seeking to substitute the Air Service

as the nation's first line of defense While Mitchell proved that aircraft could sink a battleship with the bombing of the Ostfriesland in 1921 he was unable to convince the General Staff of the Army the General Board of the Navy the Secretary of War the Secretary of the Navy or Congress of the need for an independent air force When Mitchell turned to the pen to discredit the Navy he was convicted by his own words and actions in a court martial that captivated the nation and was forced to resign in 1925 Rather than ending the rivalry for air power Mitchell's resignation set the stage for the ongoing dispute between the two services in the years immediately before WWII
