State As Entrepreneur:

The State as Entrepreneur Stuart Holland, 1972 Monograph presenting a case study of a multisectoral public enterprise industrial integration and its contribution to economic growth in Italy to illustrate the role and scope of the State as shareholder and entrepreneur in a mixed economy covers industrial policy financing mechanisms contribution to regional planning labour relations relations with government etc and explores the potential of the iri formula for other EC countries Graphs references and statistical tables

State-Business Relations and Economic Development in Africa and India Kunal Sen, 2013-05-07 When the state and business interact effectively they can promote a more efficient allocation of scarce resources appropriate industrial policy and a more effective and prioritised removal of key obstacles to growth than when the two sides fail to co operate or engage in harmful collusion This book based on original empirical research undertaken in Africa and India addresses what constitutes the effectiveness of state business relations what explains their formation and evolution over time and whether effective state business relations matter for economic performance Analysing the effects of state business relations on economic performance at both the macro and micro levels the book concludes that where effective state business relations are established either through formal or informal institutional patterns and relationships the growth effects are generally positive Establishing sustaining and renewing effective state business relations are political processes The better organized the business community and the government are for purposes of such relations the more effective state business relations will be in negotiating growth enhancing policies The book is of interest to researchers in the fields of development studies management economics and political science

Questioning the Entrepreneurial State Karl Wennberg, Christian Sandström, 2022-04-24 The 2008 financial crisis and the COVID 19 pandemic have made the authorities to increasingly turn inward and use ethnocentrism protectionism and top down approaches to guide policy on trade competition and industrial development The continuing aftereffects of such policies range from the rise and seeming success of authoritarian states rise of populist and protectionist trends and evolving academic agendas inspiring the reemergence of top down industrial policies across the world This open access edited volume contains contributions from over 30 scholars with expertise in economics innovation management and economic history The chapters offer unique theoretical and empirical contributions discussing topics such as how industrial policies affect risk incentives and information for investments They also address the policy perspectives on new technologies such as AI and its implications for market entry the role for independent entrepreneurship in increasingly regulated markets and whether governments should focus on market interventions or institutional capacity building Questioning the Entrepreneurial State initiates a much sought after debate on the notion of an Entrepreneurial State It discusses the dangers of top down approaches to industrial policy examines lessons from such approaches for future policy design and calls attention to the progress of open and contestable markets in a sound economy and society Creative destruction innovation and entrepreneurship are at the core of economic

growth The government has a clear role to provide the basic fabric of a dynamic society but industrial policy and state owned companies are the boulevard of broken dreams and unrealized visions This important message is convincingly stated in *Questioning the Entrepreneurial State* Anders Borg former Minister of Finance Sweden Misreading the dynamism of American entrepreneurship European intellectuals and policy makers have embraced a dangerous fantasy catching up requires constructing an entrepreneurial state This book provides a vital antidote The entrepreneur comes first The state may support It cannot lead Amar Bhid Thomas Schmidheiny Professor of International Business Tufts University This important new book subjects the emergence of the entrepreneurial state which reflects a shift in the locus of entrepreneurship from the individual to the public sector to the scrutiny of rigorous analysis The resulting concerns flaws and biases inherent in the entrepreneurial state exposed are both alarming and sobering The skill and scholarly craftsmanship brought to bear in this crucial analysis is evident throughout the book along with the even but ultimately consequential thinking of the authors A must read for researchers and thought leaders in business and policy David Audtretsch Distinguished Professor Ameritech Chair of Economic Development Indiana University *State-Business Relations and Economic Transformation in South Africa and Zimbabwe* Sinan Baran, 2023-06-12 In *State Business Relations and Economic Transformation in South Africa and Zimbabwe* Unfinished Transformation Sinan Baran examines state business relations SBRs in semi peripheral South Africa and peripheral Zimbabwe after each country's transition to majority rule to address why SBRs are likely to either consolidate or fracture in post transition communities In both countries the majority governments faced unresolved post transition divisions relating to race inequality and underdevelopment Baran analyzes the liberalisation and indigenisation policy choices intended to address these areas that are impacting the mining industries in South Africa and Zimbabwe as case studies Using comparative analysis and a Modern World Systems lens he argues that semi peripheral countries are less susceptible to pressures from domestic and external powers than peripheral countries during periods of economic transformation He further argues that China's significant political and economic presence in a peripheral country like Zimbabwe has more effect on SBRs than in a semi peripheral country like South Africa
