*The Social Question and the Democratic Revolution* Douglas Moggach, Paul Leduc Browne, 2000-10-18 The revolutionary movements of 1848 viewed the political cataclysm of continental Europe as an explosion of liberty a new age of freedom and equality This collection focuses on the relationship between democratic and socialist currents in 1848 seeking to reassess the relevance of these currents to the present era of global economic liberalism Published in English

*Russia's Revolution from Above 1985-2000* Gordon M. Hahn, Relying on a wealth of detailed institutional policy and elite information Hahn presents a magisterial study that fills a significant void in our understanding of USSR's destruction While readers may at times feel overwhelmed readers are presented with a conceptual approach that can be useful for appreciating ongoing institutional changes and oftentimes subtle elite maneuverings in the post Soviet era John P Willerton University of Arizona This is a big book in all respects weighty both in size and scholarship The core is a meticulous analysis of the perestroika period of the Soviet Union 1985-91 Followed by a concluding general chapter that applies the earlier analysis to post Communist Russia 1992-2000 The work is based on years of painstaking analysis considerable archival research and numerous interviews The Russian Review This is an important book with a number of substantive strengths Slavic Review The fall of the Soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century The 1991 revolution was neither a peaceful revolution from below as occurred in Czechoslovakia nor a negotiated transition to democracy like those in Poland Hungary or Latin America It was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non Russian union republics Instead as Gordon Hahn argues the Russian transformation was a bureaucrat led state based revolution managed by a group of Communist Party functionaries who won control over the Russian Republic RSFSR in the mid 1990s Hahn describes how opportunistic Party and state officials led by Boris Yeltsin defected from the Gorbachev camp and proceeded in 1990-91 to dismantle the institutions that bound state and party These revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on Russian Republic territory With the failed August 1991 hard line coup Yeltsin banned the Communist Party and decreed that all Union state organs including the KGB and military were under RSFSR control In Hahn's account this mode of revolutionary change from above explains the troubled development of democracy in Russia and the former Soviet republics Hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots The result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy Russia's Revolution from Above goes far in correcting the historical record and reconceptualizing the Soviet transformation It should be read by historians economists political scientists and Russia area scholars Gordon M Hahn is visiting scholar at the Hoover Institution Stanford University His

Vatikiotis, 2015-07-16 What does revolution mean in the Middle East Can the Middle East experience be compared with revolution in China Latin America and East Europe These questions are the focus of this book first published in 1972 which examines the revolutionary significance of the major economic social and political changes in the Middle East over the last fifty years The special feature is the consideration of the changing connotation of the word revolution and a recognition of a certain continuity in the political style of Middle Eastern societies which limits the use of the term in analysing the political change **Interpreting the Ethiopian**

**Revolution** Etana H. Dinka, 2025-10-16 Fifty years after the 1974 Ethiopian revolution Etana H Dinka brings together a who's who of modern Ethiopian studies in order to offer this long overdue analysis of the revolution and its legacies With contributions both from seasoned academics many of whom wrote about the revolution as it developed and from representatives of a younger generation this six part collection offers new insights not only into the revolution itself but also into issues such as the Red Terror the EPRDF revolution of 1991 and Abiy Ahmed's repositioning of Ethiopia after 2018 Such wide ranging analyses cumulatively cast Ethiopia's three successive post revolution regimes not as separate entities but rather as successive attempts to fulfil the promise of the revolution surrounding issues such as ethnicity the nationalities question economic development and the land tenure question In developing this model the collection captures the defining developments and issues in Ethiopia the Horn and the Red Sea region over the past fifty years and it speaks directly to a global body of knowledge about revolutions state making projects and empires and warfare and military interventions in politics A unique collection that expands the historical revolutionary analyses of Ethiopian politics and society to the present in order to suggest new ways of ensuring social economic and environmental justice for all this book is a must read for researchers and upper level students interested in Ethiopia the Horn of Africa African Studies and revolutionary politics and land economics in general **Syndicalism and the Transition to Communism** Ralph Darlington, 2013-06-28 During the

first two decades of the twentieth century amidst an extraordinary international upsurge in strike action the ideas of revolutionary syndicalism developed into a major influence within the world wide trade union movement Committed to destroying capitalism through direct industrial action and revolutionary trade union struggle the movement raised fundamental questions about the need for new and democratic forms of power through which workers could collectively manage industry and society This study provides an all embracing comparative analysis of the dynamics and trajectory of the syndicalist movement in six specific countries France Spain Italy America Britain and Ireland This is achieved through an examination of the philosophy of syndicalism and the varied forms that syndicalist organisations assumed the distinctive economic social and political context in which they emerged the extent to which syndicalism influenced wider politics and the reasons for its subsequent demise The volume also provides the first ever systematic examination of the relationship between

syndicalism and communism focusing on the ideological and political conversion to communism undertaken by some of the syndicalist movement s leading figures and the degree of synthesis between the two traditions within the new communist parties that emerged in the early 1920s Iran-Turkey Relations, 1979-2011 Suleyman Elik,2013-03 This book explores the diplomatic security and energy relations of Turkey and Iran analysing the impact of religious political and social transformation on their bilateral relationship It examines Turkey and Iran s security relations with the wider Middle East including the Kurdish Turkish War the Kurdish Iranian War and the Kurdish Arab War and their impact on regional politics
