

# Political Equality in Justice as Fairness in John Rawls Theory

7 pages | 1618 words

"To be human is to be capable of living in a society with a common good that has no metaphysical content". Discuss this statement with reference to John Rawls' notion of justice as fairness. John Rawls, an American who was described by Bill Clinton as the most influential philosopher was born (1921) and raised in Baltimore, Maryland. His adult life was a scholarly one with the exception of World War II where he witnessed brutality of the holocaust which he described as an unjust war and that citizens should resist repression and aggressive policies of governments. His most intellectual work is known as justice as fairness, a theory of a just liberal society published in 2001 and he died in 2002. With reference to this theory, I am going to systematically discuss the statement that "to be human is to be capable of living in a society with a common good that has no metaphysical content". In his theory, justice as fairness is compared to a liberal society that is fair where free citizen with equal basic rights cooperate within an egalitarian economic system. Here the common good of public well-being is in the interest of the public. Rawls hold that the most plausible understanding of just society inhabited by a human is inclined by justice as fairness which is superior than that of a dominant traditional society of utilitarianism in the modern political thought. His conception of justice is the legitimate use of power that is just with maximal standard in a democracy. Rawls argues that legitimacy in its minimal standard of moral acceptability is unjust since political order can be legitimate without being just. therefore, liberal social institutions should be arranged morally best for human to be capable of living in the society which promotes the common good that has a positive impact on the well-being of the public. The location of justice in a society is essentially important to be a human to enjoy the common good. Therefore, the just arrangement of major political and social institutions which includes the constitution, the legal system, the socio-political economy, the family among others in a liberal society is prominent to be a free human with equal right. This is what Rawls calls the basic structure of society where justice is located because of the institutions' mandate in distributing the core benefits and burdens of social life. These benefits and burdens comprise social recognition, basic rights, opportunities to get what kind of job, equitable distribution of income and wealth among others. The profound effect on the lives of citizens depends on the form of society's basic structure. Therefore, to be a human is to be capable of living in a society with a common good devoid of metaphysical content influenced by the basic structures to expand life prospects, goals, attitudes, relationships and character. However, a liberal society with exploitive and repressive institution must be justified to prevent pervasive influence on people's lives, coercing them in leaving one's society which is an unrealistic option for most people and that cannot be a justification that the people have agreed on the basic...

Sir William James ASHLEY,1888 Studies in History, Economics, and Public Law ,1896 **The Cosmopolitan State** H Patrick Glenn,2013-05-23 For more than two centuries the idea of the nation state has been widespread The expression is now widely used and is even to be unavoidable The nation state implies that the population of a state should be homogenous in terms of language religion and ethnicity the nation and the state should coincide However history demonstrates that there never has been and there never will be a nation state Human diversity is manifest in states of all sizes locations and origins This wide ranging book argues that there should be no regret in the recognition of this empirical reality since the notion of a nation state has been the justification for some of the worst atrocities in human history Since the nation state is impossible all states are cosmopolitan in character They are cosmopolitan regardless of the language of their constitutions or official teaching and regardless of the extent to which they officially recognize their own diversity The most successful states are those which are most successful in their own forms of cosmopolitanism Cosmopolitan ways are infinitely varied however and must be sought in the intricate workings of individual states The cosmopolitan character of states is necessarily reflected in their law The main instruments of legal cosmopolitanism have been those of common laws constitutionalism and what is best

described as institutional cosmopolitanism The relative importance of these legal instruments has changed over time but all three have been constantly operative even in times of attempted national and territorial closure All three remain present in the contemporary cosmopolitan state understood in terms of cosmopolitan citizens cosmopolitan sources and cosmopolitan thought The cosmopolitan state is moreover the only appropriate conceptualization of the state in a time of globalization This book outlines the subtlety of the law of cosmopolitan states law which has survived through periods of nationalism and which provides the working methods for the reconciliation of diverse populations Combining law history political science political philosophy international relations and the new logics it demonstrates that the idea of the nation state has failed and should yield to an understanding of the state as necessarily cosmopolitan in character This will be invaluable reading to all those interested in constitutional law international law and political theory
