The State of Canada's Environment, 1996 Canada. Environment Canada, 1996 The State of Canada s Environment 1996 is Canada s third national state of the environment SOE report As such it continues the ongoing evolution in national environmental reporting that began several decades ago The goal remained the same as it had been for the 1991 report that is to provide timely accurate and accessible environmental information integrated with socioeconomic factors to improve decision making and support progress towards sustainability Preface Forest Certification: A Policy Perspective Chris Elliott, 2000-01-01 This paper analyses the development of certification programmes in three countries Indonesia Canada and Sweden using the Advocacy Coalition Framework ACF as a theoretical reference point The ACF is an actor based framework for analysing policy processes and has not previously been applied in a developing country Actors in the three countries took different approaches to certification In Canada in a programme development process supported by the forest products industry a management systems approach was taken In Sweden performance standards were developed in a process initially driven by NGOs In Indonesia certification was led by an NGO within a framework established by government and a performance standards approach was used The paper concludes that forest certification can be best understood as a policy instrument that promotes and facilitates policy orientated learning among actors and provides indirect incentives for improved forest management Learning occurs both as the standards to be used for certification are developed and as they are implemented The benefits of learning and consensus building among actors such as NGOs forest companies private forest owners indigenous peoples governments etc who have traditionally been in conflict with each other can be significant On the other hand where fundamental changes in forest policy such as tenure

and forest revenue reform are needed certification should not be seen as a substitute for these A further conclusion is that while public policies change over periods of decades the private policies of retailers and forest product companies can adapt more rapidly to changing circumstances The concept of a fast track of private policy change compared to the slower track of governmental policy change is therefore proposed and described A number of interesting theoretical and empirical avenues for further research on certification are discussed

Branching Out, Digging In Sarah B. Pralle, 2006-12-22 Sarah B Pralle takes an in depth look at why some environmental conflicts expand to attract a lot of attention and participation while others generate little interest or action Branching Out Digging In examines the expansion and containment of political conflict around forest policies in the United States and Canada Late in 1993 citizens from around the world mobilized on behalf of saving old growth forests in Clayoquot Sound Yet at the same time only a very few took note of an even larger reserve of public land at risk in northern California Both cases the Clayoquot Sound controversy in British Columbia and the Quincy Library Group case in the Sierra Nevada mountains of northern California centered around conflicts between environmentalists seeking to preserve old growth forests and timber companies fighting to preserve their logging privileges Both marked important episodes in the history of forest politics in their respective countries but with dramatically different results The Clayoquot Sound controversy spawned the largest civil disobedience in Canadian history international demonstrations in Japan England Germany Austria and the United States and the most significant changes in British Columbia's forest policy in decades On the other hand the California case with four times as many acres at stake became the poster child for the collaborative conservation approach using stakeholder collaboration and negotiation to achieve a compromise that ultimately broke down and ended up in the courts Pralle analyzes how the various political actors local and national environmental organizations local residents timber companies and different levels of government defined the issues in both words and images created and reconfigured alliances and drew in different governmental institutions to attempt to achieve their goals She develops a dynamic new model of conflict management by advocacy groups that puts a premium on nimble timing flexibility targeting and tactics to gain the advantage and shows that how political actors go about exploiting these opportunities and overcoming constraints is a critical part of the policy process

The State of Canada's Forests, 1994 DIANE Publishing Company, 1995-07-01 Describes the challenges of maintaining a sustainable supply of timber while conserving the habitat of wildlife Provides information on how forest management in Canada is changing to sustain all wildlife Discusses the current status of Canada's timber supply Explains the Canadian framework of criteria that have been developed through consulting with representatives from governments industry environmental organizations and Aboriginal groups Contains charts graphs a glossary and a color map of Canada's forest regions

Policy and Practices for Biodiversity in Managed Forests Fred Bunnell, 2011-11-01 Is it possible to sustain biological diversity in managed forests Or should biodiversity strategies focus solely on reserves and protected areas A group of well known scientists specializing in forestry

issues apply scientific expertise to the hot politics of the forestry debate and present compelling evidence as to the sustainability of biological diversity in managed forests Seventeen major questions facing policy makers managers and researchers are posed in this book These questions are grouped under three major headings Where are we going How do we get there How will we know when we are there The first three chapters set the stage and provide context Fred Bunnell reviews the changing values desired from forests and changing rhythms within a forest the living dance He and Ann Chan McLeod then describe issues of managed forests that complicate efforts to sustain biological diversity Jagmohan S Maini provides an overview of policy issues confronting governments The next five chapters treat these questions and management actions at different levels of biological organization They begin with genetics Gene Namkoong and populations Gray Merriam proceed through communities Daniel Simberloff and landscapes J Stan Rowe closing with a more general treatment of scale Reed F Noss The final chapter integrates the treatments of different scales of organization by returning to the original 17 questions and providing answers based on current knowledge Policy and Practices for Biodiversity in Managed Forests addresses the major problems facing policy makers and managers in sustaining biological diversity in managed forests It is important because it links the scientific knowledge about biodiversity to the management of biodiversity bridging the gap between scientists and decision makers The unique focused approach of this book makes it useful for students resource practitioners and policy makers
