**Europeanization and Territorial Politics in Small European Unitary States** Sandra Antunes, John Loughlin, 2020-12-17 The book addresses the impact of the European Union EU on subnational mobilization in small unitary states Located at the intersection of contributions from the literatures on multilevel governance and Europeanization this book offers a new theoretical framework to account for state rescaling processes in small unitary states By means of a comparative analysis of eight small unitary states in Europe this book shows that the impact of the EU on subnational mobilization is filtered through domestic mediating factors which can lead to three possible outcomes decentralization recentralization or no change The book offers a balanced combination of analytical clarity and the richness of empirical accounts in a wide diversity of case studies It sheds a new light on the hybrid nature of the European polity and demonstrates that member state governments have remained the most important pieces of the European puzzle Overall it arrives at two conclusions first that we are witnessing a transformation of the state rather than its demise second the notion of a Europe of the Regions in small unitary states was no more than a damp squib The chapters in this book were originally published as a special issue of the journal *Regional Federal Studies*

### The Political Economy of the European Social Model Philip

Whyman,Mark Baimbridge,Andrew Mullen,2012 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics the European Union European Economics and Economic institutions

### The Regional Challenge in Central and Eastern Europe

Michael Keating, James Hughes, 2003 Central and eastern European countries are undergoing internal transformations to liberal democracy and the market economy. At the same time they must meet the criteria for European integration. This book examines the territorial dimension of these challenges. Central and eastern Europe has its own distinct histories of territorial politics and state structures which continue to influence the present. Like their western neighbours the countries of the region must confront a world in which politics and policy making are changing in scale with the emergence of new local and intermediate levels. The market economy and free trade can lead to increasing economic disparities. National and ethnic minorities create a demand for local and regional devolution. The European Commission and other external agents have posed requirements for new administrative structures to manage European funding. All this creates a complex set of pressures to which the transition countries must respond. This book by an international group of scholars examines these challenges from a diversity of angles historical, economic, political and institutional. *How Democratic is Latvia*, 2005

**Central European Political Science Review**, 2004 *Notes et documents*, 1995 ECE, 2000 *The Foundations of Bureaucracy in Economic and Social Thought* William Ieuan Jenkins, Edward Page, 2004 These two landmark volumes prepared by leading authorities in the field locate bureaucracy in its proper historical and theoretical context. They demonstrate that far from being a spent force bureaucratic organisations and processes are and will continue to be of central importance in the new millennium. Volume I outlines both the changing historical forms of bureaucracy and its operation in contemporary political systems before moving on to examine the detail of bureaucratic structures and processes. Volume II discusses bureaucrats in action and the political dimensions of bureaucratic power. In addition it explores the various critiques of bureaucracy before analysing the recent agendas for bureaucratic reform and the strengths and weaknesses of alternative structures. These two authoritative volumes will be essential reading for political scientists, historians, organisational and administrative theorists and students of public sector management old and new. **Grant\$ for Foreign and International Programs**, 1994
