*States, Markets and Foreign Aid* Simone Dietrich, 2021-11-11 Explores the different choices made by donor governments when delivering foreign aid projects around the world

*States, Markets and Wars in Global History* Giulio Sapelli, 2023-09-30 This wide ranging book focuses on the economic and political changes that have taken place between the advent of globalization and the COVID 19 pandemic and assesses how this may bring about a profound reconfiguration of the global political system Sapelli considers a range of developments in different spheres from international to national politics military aggressions and worldwide political trends such as the rise of populism to illuminate the moment of neoliberal crisis in which we now live He argues that Europe and its institutions in particular no longer demonstrate a model of diplomacy and statesmanship with the rise of technocratic structures and elitism reflecting how an ideal of global convergence towards liberalism and democracy no longer holds true The book then considers how a new international order based on the reason of state can be brought about by global cooperation between the US Russia and China along with a return to properly regulated finance and a renewed focus on community in the wake of the coronavirus pandemic The book will be of interest to those working in international economics and international relations as well as academics of economic history and political economy

*States, Markets, Families* Julia S. O'Connor, Ann Shola Orloff, Sheila Shaver, 1999-01-28 The 1990s have seen dramatic restructuring of state social provision in the US the UK Canada and Australia This has occurred largely because of the rise of market liberalism which challenges the role of the state This important book examines the impact of changes in social policy regimes on gender roles and relations Structured thematically and systematically comparative it analyses three key policy areas labor markets income maintenance and reproductive rights Largely driven by issues of equality it considers the role of the state as a site for gender and sexual politics at a time when primacy is given to the market developing an argument about social citizenship in the process Eminent scholars in the field Julia O'Connor Ann Orloff and Sheila Shaver make a landmark contribution to debates about social policy and gender relations in this era of economic restructuring and deregulation

**Education Between State, Markets, and Civil Society** Heinz-Dieter Meyer, William Lowe Boyd, 2001-05-01 How should education be organized in pluralistic and multicultural societies What are the roles in education of civil society markets governments and the family How can the idea of the civil society help to reorient education policy discussions that are sometimes stuck in either or juxtapositions of market versus government or individualism versus communitarianism What are some of the traditions of civil society across countries and across history that educators and policymakers today can revive or build on These questions are at the center of this book Its goal is to understand how we can accommodate cultural ethnic and religious pluralism in a political and conceptual framework that is sufficiently flexible to combine choice with equity a commitment to a shared civil and political culture with openness to exploring and affirming the distinct ethnicity race creed or culture of different groups To address these questions the authors take up the notion of the

civil society an idea that has experienced a popular and scholarly revival in recent years as numerous citizens action groups political philosophers and social scientists make the case that only a democratic civil society can sustain a democratic state The implications of this development for education have to date been very little explored This book is a step toward addressing this gap Going beyond simple juxtapositions of market versus government in education reform the book as a whole develops an integrative perspective informed by the idea of the civil society It combines current policy issues with a look at their historical development and evaluates U S educational policy in the context of a range of international cases The authors education scholars sociologists economists historians and philosophers explore from diverse disciplinary political and philosophical points of view the potential of the civil society and civic associations for education At the same time they share the hope that a thorough reconsideration of the role of the state the market and the civil society will help to energize ongoing experiments with charter schools voucher schemes and a variety of other plans to increase educational and school autonomy
