Statistical Process Control ,1995 Statistical Process Control G. Barrie Wetherill,Don W. Brown,2013-08-02

Statistical process control SPC is now recognized as having a very important role to play in modern industry Our aim in this book has been to present SPC techniques in a simple and clear way and also to present some of the underlying theory and properties of the techniques This volume arises partly out of a revision of Wetherill 1977 and partly out of experience in teaching and implementing SPC at industrial sites especially with ICI It would have been impossible to come to our present understanding of this field without the joint efforts of industry and university A number of features of this book are new 1 The special emphasis on process industry problems including one at a time data 2 The discussion of between and within group variation and the effects of this on charting and on process capability analysis 3 The derivation of the properties of the techniques has not been gathered together before 4 The presentation of sampling by variables contains many new features The techniques themselves are presented in a very simple way by using method summaries and these could be a basis for training when SPC is implemented *Statistical Process Control* G.B. Wetherill,D.W. Brown,1991-05-15 Aims to present statistical process control techniques in a simple and clear way and to present some of the underlying theory and properties of the techniques The book contains exercises that explore the techniques and are mathematical and technical *Statistical Applications in Process Control* J. Bert Keats,Douglas C. Montgomery,1996-03-15 This work presents significant advances and new methods both in statistical process control and experimental design It addresses the management of process monitoring and experimental design discusses the relationship between control charting and hypothesis testing provides a new index for process capability studies offers practical guidelines for the design of experiments and more

[Data Processing and Reconciliation for Chemical Process Operations](#) José A. Romagnoli, Mabel Cristina Sanchez, 1999-10-25 Computer techniques have made online measurements available at every sampling period in a chemical process. However measurement errors are introduced that require suitable techniques for data reconciliation and improvements in accuracy. Reconciliation of process data and reliable monitoring are essential to decisions about possible system modifications optimization and control procedures analysis of equipment performance design of the monitoring system itself and general management planning. While the reconciliation of the process data has been studied for more than 20 years there is no single source providing a unified approach to the area with instructions on implementation. Data Processing and Reconciliation for Chemical Process Operations is that source. Competitiveness on the world market as well as increasingly stringent environmental and product safety regulations have increased the need for the chemical industry to introduce such fast and low cost improvements in process operations. Introduces the first unified approach to this important field. Bridges theory and practice through numerous worked examples and industrial case studies. Provides a highly readable account of all aspects of data classification and reconciliation. Presents the reader with material problems and directions for further study
