Statistical Applications In Criminal Justice:

Statistical Applications in Criminal Justice Gennaro F. Vito, Edward J. Latessa, 1989-12 This textbook is specifically designed to give criminology and law students the elements of social statistics Using examples entirely from criminology law and justice research the authors begin with simple mathematical notation and manipulation and work up through definitions of major terms reading of graphs charts and tables theoretical basis of statistics with discussions of probability sampling and hypothesis testing Only when the student has a firm mastery of these basic tools do the authors present some of the basic statistical techniques most commonly used in criminal justice research such as t tests correlations simple regression ANOVA and measures of association Quantitative Tools for Criminal Justice Planning Leonard Oberlander, 1975 **Simple**

Statistics Terance D. Miethe, 2007 Simple Statistics provides a concise and compelling introduction to basic statistics for students of criminology and criminal justice Written in a conversational tone it does not dumb down the material instead it demonstrates the value of statistical thinking and reasoning in context The text covers essential techniques instead of attempting to provide an encyclopedic sweep of all statistical procedures Author Terance D Miethe illustrates how verbal statements and other types of information are converted into statistical codes measures and variables While most statistics texts emphasize how to do statistical procedures they often neglect to explain why we do them This unique book covers both areas and the problems at the end of each chapter focus on applications offering even more context for why we do these procedures Simple Statistics uses hand computation methods to demonstrate how to apply the various statistical procedures and most chapters include an optional section on how to do these procedures in SPSS and or Microsoft Excel spreadsheets Helpful examples illustrate each statistical procedure and specific problems detailed summaries key terms and major formulas are provided at the end of each chapter to further highlight major points A comprehensive Instructor s Manual is also available **The Practice of Research in Criminology and Criminal Justice** Ronet Bachman, Russell K. Schutt, 2007

This text provides a practical guide to qualitative and quantitative social research techniques integrated with issues from criminal justice **Statistics for Criminology and Criminal Justice** Ronet D. Bachman, Raymond Paternoster, Theodore H. Wilson, 2021-02-08 Communicating the excitement and importance of criminal justice research this practical and comprehensive book shows students how to perform and understand statistical analyses while helping them recognize the connection between statistical analyses used in everyday life and their importance to criminology and criminal justice This updated Fifth Edition is packed with real world case studies and contemporary examples utilizing the most current crime data and empirical research available Each chapter presents a particular statistical method in the context of a substantive research story **Essentials of Statistics for Criminology and Criminal Justice** Raymond Paternoster, Ronet D. Bachman, 2017-01-30 Essentials of Statistics for Criminology and Criminal Justice helps students understand the vital role that research and statistics play in the study of criminology and criminal justice by showing them how to conduct and

interpret statistics in real world settings with a step by step approach to solving problems This practical applied approach offers students the fundamentals of descriptive and inferential statistics in a concise and easy to understand format avoiding complicated proofs and discussions of statistical theory The examples and case studies provide relevant examples for criminology and criminal justice students and deal with contemporary issues related to crime corrections police and the judicial system Students will not only learn about the how to in statistics but they will also recognize its importance in today s criminal justice system

Statistics in Criminal Justice David Weisburd, Chester Britt, 2013-12-11 Statistics in Criminal Justice takes an approach that emphasizes the application and interpretation of statistics in research in crime and justice This text is meant for both students and researchers who want to gain a basic understanding of common statistical methods used in this field In general the text relies on a building block approach meaning that each chapter helps to prepare the student for the chapters that follow It also means that the level of sophistication of the text increases as the text progresses Throughout the text there is an emphasis on comprehension and interpretation rather than computation However as the statistical methods discussed become more complex and demanding to compute there is increasing use and integration of statistical software This approach is meant to provide the reader with an accessible yet sophisticated understanding of statistics that can be used to examine real life criminal justice problems with popular statistical software programs The primary goal of the text is to give students and researchers a basic understanding of statistical concepts and methods that will leave them with the confidence and the tools for tackling more complex problems on their own New to the 4th Edition New chapter on experimental design and the analysis of experimental data New chapter on multi level models including growth curve models New computer exercises throughout the text to illustrate the use of both SPSS and Stata Revision of exercises at the end of each chapter that places greater emphasis on using statistical software Additional resources on the text s web site for instructors and students including answers to selected problems syntax for replicating text examples in SPSS and Stata and other materials that can be used to supplement the use of the text

Criminal Justice Forecasts of Risk Richard Berk, 2012-04-06 Machine learning and nonparametric function estimation procedures can be effectively used in forecasting One important and current application is used to make forecasts of future dangerousness to inform criminal justice decision Examples include the decision to release an individual on parole determination of the parole conditions bail recommendations and sentencing Since the 1920s risk assessments of various kinds have been used in parole hearings but the current availability of large administrative data bases inexpensive computing power and developments in statistics and computer science have increased their accuracy and applicability In this book these developments are considered with particular emphasis on the statistical and computer science tools under the rubric of supervised learning that can dramatically improve these kinds of forecasts in criminal justice settings The intended audience is researchers in the social sciences and data analysts in criminal justice agencies
