

Official Stats: Theoretical Factors

Strengths (Positivism)

- Provide an **overview of social life**.
- Enable **easy comparisons** between social groups and countries
- They enable us to **make historical comparisons** and to **establish trends**
- The government is the only institution large enough and **'representative'** enough to collect massive data sets on public issues
- Using them allows the researcher to remain **detached** from respondents

Limitations (Interpretivism)

- Some Official Statistics **lack validity** – e.g. not all crimes will be reported*.
- **Lack validity** because they are collected by the state and **manipulated** to make things look better than they actually are. E.g. unemployment statistics*.
- May **serve the interests of elite groups** – Data is only collected on things which do not harm those in power*.
- The way that some social trends are measured **changes over time** – **making historical comparisons difficult**.

***Official Statistics are Socially Constructed**
