**A Scheme of Heaven** Alexander Boxer, 2020-01-14 An illuminating look at the surprising history and science of astrology civilization's first system of algorithms from Babylon to the present day Humans are pattern matching creatures and astrology is the universe's grandest pattern matching game In this refreshing work of history and analysis data scientist Alexander Boxer examines classical texts on astrology to expose its underlying scientific and mathematical framework Astrology he argues was the ancient world's most ambitious applied mathematics problem a monumental data analysis enterprise sustained by some of history's most brilliant minds from Ptolemy to al Kindi to Kepler Thousands of years ago astrologers became the first to stumble upon the powerful storytelling possibilities inherent in numerical data To correlate the configurations of the cosmos with our day to day lives astrologers relied upon a scheme of heaven or horoscope showing the precise configuration of the planets at a particular instant in time as viewed from a particular place on Earth Although recognized as pseudoscience today horoscopes were once considered a cutting edge scientific tool Boxer teaches us how to read these esoteric charts and appreciate the complex astronomical calculations needed to generate them by diagramming how the heavens appeared at important moments in astrology's history from the assassination of Julius Caesar as viewed from Rome to the Apollo 11 lunar landing as seen from the surface of the Moon He then puts these horoscopes to the test using modern data sets and statistical science arguing that today's data scientists do work similar to astrologers of yore By looking back at the algorithms of ancient astrology he suggests we can better recognize the patterns that are timeless characteristics of our own pattern matching tendencies At once critical rigorous and far ranging A Scheme of Heaven recontextualizes astrology as a vast technological project spanning continents and centuries that foreshadowed our data driven world today
