## **Status Of Soviet Civil Science:**

**The Status of Soviet Civil Science** Craig Sinclair,2012-12-06 This volume represents one outcome of the initiatives taken from time to time by the NATO Science Committee to add to the work of supporting civil science within the Alliance by mounting open meetings or other projects dealing with some topical aspect of science and technology policy Past examples have included the 20th anniversary meeting of the establishment of the Science Committee in 1978 which made a review of the achievements of the various programmes It proved to be a valuable opportunity to take stock of the impact of science and technology on Western societies and was a particularly useful occasion for a critical analysis of the changing nature and social role of science and technology In contrast the Science Committee Conferences in 1973 and 1976 on the Technology of Efficient Energy Utilization and on Thermal Energy Storage were responses of the Committee to specific technological problems engendered by the then acute energy supply position A similar technologically oriented study was made in 1975 of the Rational Use of Potentially Scarce Metals These initiatives were the counterpoint to the bulk of the continuing work of the Committee in funding scientific mobility in the Alliance as support to civil science This latter is done competitively in response to unsolicited applications The Committee hopes to demonstrate by its special activities its flexibility and responsiveness to the evolving activities technologists and policy makers

**Soviet Science on the Edge of Reform** Harley D. Balzer,2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist

**Research and Development Management: From the Soviet Union to**

**Russia** Christoph M. Schneider,2013-11-11 In the past intensive interest in Soviet research and development has been sporadic both in the West and in the USSR The end of the 1980s coincided with the demise of the Soviet model of economic development As a result a surge of attention has been given to the factors driving the motor of Soviet growth and development as well as R D The opening first of the Soviet and subsequently of the Russian economy finally exposed it to global standards The long period of international isolation with respect and technological exchanges made it difficult for scholars and policy makers at home and abroad to measure the status of Soviet advances Consequently some overrated the levels while others underestimated them Now it comes to light that although the Soviets put the first satellite in space Sputnik and developed their own hydrogen bomb these were more the exceptions of innovation from research results rather than the rule Therefore as the management of the entire economy increasingly malfunctioned so did the

management of R D in contributing to economic growth and development There is no denying the incredible investment of the former Soviet state in domestic science and research The R D community was one of the largest if not the largest in the world during the second half of the twentieth century Now Russia has inherited not only this enormous resource but also the inadequate organization management and structure     *NATO Review* ,1987     **Proceedings of the Academy of Sciences of the USSR.** ,1958     **Proceedings of the Academy of Sciences of the USSR.** Akademii<sup>ы</sup> nauk SSSR.,1963
