- Oceangoing steamships came later than river ships due to fuel and stability constraints
- Soon eclipsed the clipper ships (average speed versus bursts)
- Construction of iron ships spelled end of dominance of American shipbuilders
- Steamships resulted in drastic decrease in cost of freight and passage

*Steam Conquers the Atlantic* David Budlong Tyler, 1939 A history of Atlantic Steamships      **Steam Conquers the Atlantic** David Budlong Tyler, 1939      **The Impact of Technological Change** John Armstrong, David M. Williams, 2017-10-18 This book presents an in depth study of the impact of the steamship on Britain during its first forty years roughly between 1810 and 1850 It relates the early steamship to several industrial themes including diffusion construction modernisation the role of government particularly the difficult attempt to align laissez faire politics with the greater need for public safety measures due to technological advance business and finance plus public reaction and tourism The aim is to establish the significance of the steamship as a conduit of modernisation and societal change It consists of a foreword introduction and fourteen chapters devoted to specific themes structured to ensure each chapters build on the preceding chapter s progress Collectively they demonstrate that the development of both experience and enterprise with steam power both gained and refined during this period made the mid century expansion of steamship technology across Britain possible Ultimately it establishes that steamship services began to adapt to oceanic routes steam began to integrate into the world economy and the age of sail began to draw to a close      Geographies of Nineteenth-Century Science David N. Livingstone, Charles W. J. Withers, 2011-12-01 In *Geographies of Nineteenth Century Science* David N Livingstone and Charles W J Withers gather essays that deftly navigate the spaces of science in this significant period and reveal how each is embedded in wider systems of meaning authority and identity Chapters from a distinguished range of contributors explore the places of creation the paths of knowledge transmission and reception and the import of exchange networks at various scales Studies range from the inspection of the places of London science which show how different scientific sites operated different moral and epistemic economies to the scrutiny of the ways in which the museum space of the Smithsonian Institution and the expansive space of the American West produced science and framed geographical understanding This volume makes clear that the science of this era varied in its constitution and reputation in relation to place and personnel in its nature by virtue of its different epistemic practices in its audiences and in the ways in which it was put to work      **Steam and the Sea** Paul Forsythe Johnston, 1983      *Monitor Builders* William Norwood Still (Jr.), 1988      **Harvard Guide to American History** Frank Freidel, Frank Burt Freidel, Richard K.
