Steam And The North Atlantic Mails:

Steam and the North Atlantic Mails J. C. Arnell, 1986 Across the Oceans Seija-Riitta Laakso, 2007-09-28 In the early 19th century the only way to transmit information was to send letters across the oceans by sailing ships or across land by horse and coach Growing world trade created a need and technological development introduced options to improve general information transmission Starting in the 1830s a network of steamships railways canals and telegraphs was gradually built to connect different parts of the world The book explains how the rate of information circulation increased many times over as mail systems were developed Nevertheless regional differences were huge While improvements on the most significant trade routes between Europe the Americas and East India were considered crucial distant places such as California or Australia had to wait for gold fever to become important enough for regular communications The growth of passenger services especially for emigrants was a major factor increasing the number of mail sailings The study covers the period from the Napoleonic wars to the foundation of the Universal Postal Union UPU and includes the development of overseas business information transmission from the days of sailing ships to steamers and the telegraph **The Bulletin of the American Iron and Steel Association** American Iron and Steel Association, 1897 Merchant Marine Investigation--Appendix United States. Congress. House Merchant Marine and Fisheries, 1932 **Merchant Marine Investigation** United States. Congress. House.
