## Taste Of Toronto:

*The city guide for Toronto (Ontario) YouGuide Ltd, Food Will Win the War Ian Mosby,2014-05-21* During WWII as Canada struggled to provide its allies with food nutritionists warned that malnutrition could derail the war effort Posters admonished women and children to Eat Right Feel Right because Canada Needs You Strong while cookbooks helped housewives become housoldiers through food rationing menu substitutions and household production Food Will Win the War explores the symbolic and material transformations that food and eating underwent during the war and the profound social political and cultural changes that took place in the 1940s Through official food guides and policies the state took unprecedended steps into the kitchens of the nation transforming the way women cooked what their families ate and how people thought about food Canadians in turn rallied around food and nutrition to articulate new visions of citizenship for their postwar future

*Food Fears Alison Blay-Palmer,2016-04-15* The industrial food system of the West is increasingly perceived as problematic The physical social and intellectual distance between consumers and their food stems from a food system that privileges quantity and efficiency over quality with an underlying assumption that food is a commodity rather than a source of nourishment and pleasure In the wake of various food and health scares there is a growing demand from consumers to change the food they eat which in turn acts as a catalyst for the industry to adapt and for alternative systems to evolve Drawing on a wealth of empirical research into mainstream and alternative North American food systems this book discusses how sustainable grass roots local food systems offer a template for meaningful individual activism as a way to bring about change from the bottom up while at the same time creating pressure for policy changes at all levels of government This movement signals a shift away from market economy principles and reflects a desire to embody social and ecological values as the foundation for future growth
