## **Speaking For Results:**

Speak and Get Results Sandy Linver, Jim Mengert, 1994-05-31 We've all known the naturals people who can get up to speak in any business situation and make something happen. They get the budget approved, win the big account, get the group's support at the weekly staff meeting. When the naturals finish speaking, people believe and act. Now fully revised and updated, Speak and Get Results helps you to be a natural. It helps you to get the results you want by teaching you how to motivate your listeners to reach your result, choose an opening that targets your ideas, design visuals that support you, not sabotage you, use your body and your voice to express your energy, authority, and commitment, handle tough Q & A sessions, audience resistance, and even surprise media encounters.

**Speaking for Results** Ralph A. Micken, 1958 *Personality Research, Methods, and Theory* Patrick E. Shrout, Susan T. Fiske, 2014-04-04 Donald W. Fiske's professional life and collaborations are themselves a textbook in the development of the field of personality. From the field's early origins in personnel selection, rating accuracy, and psychotherapy outcomes to its current status of theoretical and methodological maturity, complete with mid-life crises, the field has been fundamentally changed by Fiske's work, and the changes have influenced generations of scholars. This festschrift is a celebration of Fiske's impact but not merely of his impact on the history of personality research. Instead, the volume focuses on ongoing debates and issues that have been framed or influenced by Fiske's work. The festschrift's three sections are organized around three themes in Fiske's writings: themes that also correspond to three periods in his career. This volume examines current thinking about what can be known about personality, how constructs relevant to personality psychology are best measured, and how to approach specific research problems in personality and related fields. The contributors create an eminent cross-section of the development and current status of personality methods. In addition to Fiske's eminent contemporaries, the contributors to this volume include Fiske's former students, collaborators, and his two children, both of whom are behavioral scientists. The accomplishments of his students, colleagues, and children testify to the range of psychologists who have benefited from his scholarly and practical wisdom. This collection is a valuable textbook for an advanced graduate course as well as as appealing as a scholarly resource. Many of the contributors are renowned psychological leaders who have made available their latest original thoughts. The book concludes with an essay by Fiske offering his

perspective on the central themes behavioral and social science metatheory methods and strategies      **Advances in Cross-Language Information Retrieval** Cross-Language Evaluation Forum. **Language, Cognition and Gender** Alan Garnham, Jane Oakhill, Lisa von Stockhausen, Sabine Sczesny, 2016-08-08. Gender inequality remains an issue of high relevance and controversy in society. Previous research shows that language contributes to gender inequality in various ways. Gender related information is transmitted through formal and semantic features of language such as the grammatical category of gender through gender related connotations of role names e.g. manager secretary and through customs of denoting social groups with derogatory vs. neutral names. Both as a formal system and as a means of communication language passively reflects culture specific social conditions. In active use it can also be used to express and potentially perpetuate those conditions. The questions addressed in the contributions to this Frontiers Special Topic include how languages shape the cognitive representations of gender how features of languages correspond with gender equality in different societies how language contributes to social behaviour towards the sexes how gender equality can be promoted through strategies for gender fair language use. These questions are explored both developmentally across the life span from childhood to old age and in adults. The contributions present work conducted across a wide range of languages including some studies that make cross linguistic comparisons. Among the contributors are both cognitive and social psychologists and linguists all with an excellent research standing. The studies employ a wide range of empirical methods from surveys to electro physiology. The papers in the Special Topic present a wide range of complimentary studies which will make a substantial contribution to understanding in this important area.
