Your book is becoming one of the go-to books for teaching structure determination here in the States Great work I would definitely state that this book is the most useful aid to basic organic spectroscopy teaching in existence and I would strongly recommend every instructor in this area to use it either as a source of examples or as a class textbook

Magnetic Resonance in Chemistry Over the past year I have trained many students using problems in your book they initially find it as a task But after doing 3-4 problems with all their brains activities working out the rest of the problems become a mania They get addicted to the problem solving and every time they solve a problem by

themselves their confident level also increases I am teaching the fundamentals of Molecular Spectroscopy and your books represent excellent sources of spectroscopic problems for students
