National Oil Companies and Value Creation Silvana Tordo,2011-07-13 National Oil Companies NOCs directly or indirectly control the majority of oil and gas reserves As such they are of great consequence to their country s economy to importing countries energy security and to the stability of oil and gas markets The paper analyzes the available evidence on the objectives governance and performance of 20 NOCs from both net importing and net exporting countries and draws conclusions about the design of policies and measures that are more likely to lead to social value creation NOCs differ from private companies on a number of very important variables including the level of competition in the market in which they operate their business profile along the sector value chain and their degree of commercial orientation and internationalization Most share some core characteristics they are usually tied to the national purpose and serve political and economic goals other than maximizing the firm s profits This paper introduces a conceptual model to analyze value creation by NOCs that takes into consideration their complex objective function Our analysis aims to answer the following questions Are certain corporate governance arrangements more suited than others to promote value creation Is good geology a pre condition for NOC value creation Are there benefits from exposing the NOC to competition from private oil companies Does the development of forward and backward linkages hamper NOC value creation *State Owned Multinationals* Jean-Pierre Anastassopoulos,Georges Blanc,Pierre Dussauge,1987-12-14 Written as a result of a world wide study of major multinational state owned companies this book examines the extent of the state owned multinational phenomenon It identifies certain companies analyzes their origins and describes how and where they operate abroad **Energy Research Abstracts** ,1982

most developing countries may enjoy rapid growth if they are stable. The importance of this study is clear. South Sudan is confronted with enormous challenges of administrative, ethnic, political and economic development. In light of this, the current study addresses the following issues: What is the impact of the political system in South Sudan on economic development? What is the impact of oil resources on sustainable development? What is the impact of the oil shutdown on political and economic stability and what is the possibility of deficit financing? Is there any possibility for cooperation between Sudan and South Sudan? In this context, the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development. It also seeks to analyse the political history of Sudan in general and South Sudan in particular, emphasising the importance of political stability among other considerations as a precondition for socioeconomic development. Furthermore, other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability. In light of the above, this study focuses on the issues of the political transition and policies that will improve the economic, political and social well-being of the people of South Sudan. It seeks ways of setting up policies that will raise the standard of living of people with sustained growth and move from a simple low income economy to a modern high income economy. It also attempts to develop a framework for cooperation between Sudan and South Sudan. The methodology that is adopted to address these issues is collecting, sorting and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis, information sources, references and books. However, this study is organized as follows: chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis; it is divided into four sections. Section 1 focuses on definition, causes and measurement of political stability with an aim to assess the effect of political stability on growth related variables. In section 2 we define the concept of political instability and measure it by using indicators like the number of coups, the number of major government crises, the number of cabinet changes and the number of political revolutions as well as political assassinations. Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements. The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development. Chapter 2 presents the political and social background of South Sudan. It is divided into three sections: Section 1 discusses South Sudan's ability to function and successfully implement its policies and strategic vision for the year 2040. Section 2 focuses on the demographic structure of South Sudan in terms of population, education, languages and culture. Section 3 discusses the social indicators such as infrastructure, poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan. Chapter 3 focuses on the South Sudan economy and the challenges

Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities. This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation political reform and oil shutdown as well as investment opportunities in oil and agriculture. In chapter 4 we discuss South Sudan's oil and economic development. It focuses on oil resources and their impact on sustainable development the impact of oil shutdown on political and economic development and the possibility of deficit financing. In chapter 5 we discuss the future of stability and prosperity in South Sudan. It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries. The major findings of this study are as follows. Political stability plays an important role in determining economic growth and economic development in many economies. The degree of political stability is high if there is a high degree of democracy or autocracy. Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development. It is then the level of political stability within a given country regardless of regime type that results in economic growth. Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources domestic foreign or deficit finance to use efficiently for financing economic development. Most economists view corruption as a major obstacle to development. It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps e.g. Blackburn et al 2006. Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult. Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty.
