Yael Navaro-Yashin, 2020-06-16 *Faces of the State* is a penetrating study of the production of a state revering political culture in the public life of 1990s Turkey. In this new contribution to the anthropology of the state, Yael Navaro-Yashin brings recent poststructuralist and psychoanalytic theory to bear on the study of the political. Delving deeper than studies of nationalist discourse that would focus on consciously articulated narratives of political identity, the author explores sites of fantasy in the public political domain of Istanbul. The book focuses on the conflict over secularism in the aftermath of an Islamist victory in the city's municipalities. In contrast with studies that would problematize and objectify religious movements, the author examines the agency of secularists under a state widely known for its secularist policies. The complexity and dynamism of the context studied moves well beyond scholarly distinctions between secularity and religion as well as state and society. Here secularism and Islamism emerge as different guises for a culture of statism where people from society compete to claim Turkish culture for themselves and their life practices. With this work that stretches the boundaries of regionalism, the author situates her anthropological study of Turkey not only in scholarship on the Middle East but also in the broader problem of thinking Europe anew.

Reinventing World War II Barbara A. Biesecker, 2024-08-09 By the 1970s World War II had all but disappeared from US popular culture. But beginning in the mid-eighties it reemerged with a vengeance and for nearly fifteen years World War II was ubiquitous across US popular and political culture. In this book Barbara A. Biesecker explores the prestige and rhetorical power of the Good War, revealing how it was retooled to restore a new kind of social equilibrium to the United States. Biesecker analyzes prominent cases of World War II remembrance, including the canceled exhibit of the *Enola Gay* at the National Air and Space Museum in 1995 and its replacement, Steven Spielberg's *Saving Private Ryan*. Tom Brokaw's *The Greatest Generation* and the United States Holocaust Memorial Museum. Situating these popular memory texts within the culture and history wars of the day and the broader framework of US political and economic life, Biesecker argues that with the notable exception of the Holocaust Memorial Museum, these reinventions of the Good War worked rhetorically to restore a strong sense of national identity and belonging fitted to the neoliberal nationalist agenda. By tracing the links between the popular retooling of World War II and the national state fantasy and by putting the lessons of Foucault, Derrida, Lacan, and their successors to work for a rhetorical political analysis of the present, Biesecker not only explains the emergence and strength of the MAGA movement but also calls attention to the power of public memory to shape and contest ethnonational identity today. This book will interest rhetoricians and historians as well as students and scholars in the fields of US politics and communication studies.

The First Freedoms and America's Culture of Innovation Narain D. Batra, 2013-10-18 This is a book about the dynamics of the aspirational society. It explores the boundaries of permissible thought deviations and transgressions that create constant innovations. When confronted with a problem, an innovative mind struggles and brings forth something distinctive: new ideas, new inventions, and new programs based on unconventional approaches to solve the problem. But this can be done only if the culture creates large breathing spaces by leaving people

alone not as a matter of state generosity but as something fundamental in being an American Consequently the Constitutional mandate of Congress shall make no law has encouraged fearless speech unrestrained thought and endless experimentation leading to newer developments in science technology the arts and not least socio political relations Most of all the First Freedoms liberate the mind from irrational fears and encourage an environment of divergent thinking non conformity and resistance to a collective mindset The First Freedoms encourage Americans to be iconoclastic to be creatively crazy to be impure thus enabling them to mix and re mix ideas to design new technologies and cultural forms and platforms anything from experimental social relations and big data explorations to electing our first black president

Rehnquist Justice Earl M. Maltz, 2003 With seven of its justices appointed by Republican presidents today s Supreme Court has significantly altered America s legal landscape since 1986 by tilting constitutional jurisprudence to the right That was the goal of Presidents Reagan and Bush in filling court vacancies and has been felt in cases related to federalism economic rights and affirmative action However liberal issues such as abortion have moved only marginally to the right while rulings by the Court on school prayer and gay rights have moved constitutional doctrine slightly to the left In this collection of original articles prominent constitutional scholars are joined by new voices from the cutting edge of academia to subject the Rehnquist Court to closer scrutiny and to show that its brand of conservatism is less extreme than many have supposed Reflecting views across the political spectrum the contributors help readers understand the Court dynamic its constrained conservatism and the forces that shape constitutional law in general As these authors show the overall pattern of decision making in the Rehnquist era cannot be attributed to any single unified approach to constitutional analysis Instead today s Court can only be understood as the product of a complex interaction among individual justices each with an idiosyncratic view of the proper interpretation of the Constitution and the role of the Court in the American political system These provocative essays are designed to provide readers with insight into this interaction by focusing on each member of the bench From the staunch conservatism of Clarence Thomas to the accommodationism of Sandra Day O Connor to the liberal constitutionalism of David Souter the essays analyze the unique approach of each justice to interpreting the Constitution They also show that the current justices are the product of a nomination and confirmation process that has undergone a major transformation in recent decades one which favors experienced often unknown jurists over high profile public servants By concentrating attention on its members Rehnquist Justice allows us to better understand the Supreme Court as a whole And by assessing today s judiciary in light of a public philosophy that looks askance at government it shows us that the Supreme Court has truly become a mirror of its times
