*Empirical Research in Statistics Education* Andreas Eichler, Lucía Zapata-Cardona, 2016-06-18 This ICME 13 Topical Survey provides a review of recent research into statistics education with a focus on empirical research published in established educational journals and on the proceedings of important conferences on statistics education. It identifies and addresses six key research topics namely teachers knowledge, teachers role in statistics education, teacher preparation, students knowledge, students role in statistics education and how students learn statistics with the help of technology. For each topic the survey builds upon existing reviews complementing them with the latest research.

**Statistical Analysis in Educational Research** E. F. Lindquist, 1940 This book however has not been restricted to techniques which are directly attributable to R A Fisher. Its purpose more generally stated has been to make more readily available and comprehensible to students in education any of the more recent developments in statistical theory and practice which seem likely to prove of value in education research but which thus far have received little or no attention in the standard introductory texts in educational statistics. In particular an effort has been made to bring the student up to date on the logic of statistical inference and to make him more keenly conscious of the constant need for very critical consideration of the assumptions underlying any statistical technique he may employ. The writer is convinced that the development of a genuine understanding of the nature of statistical inference and a thorough training in the use of the methods of analysis of variance should be considered an absolute essential in the general preparation of research students in education. Preface iv v
