**Consequences and Perceptions of Status Consumption** Sona Klucarova,2020 Consumption of certain products or services often brings status or prestige to the consumer Such status consumption plays an essential role in the lives of many consumers and in today s economy In my two dissertation essays I seek to examine the role of status consumption in consumer behavior context In the first essay I explore the connection between status consumption and charitable donation behavior The results of nine studies demonstrate that status consumption considered a self centered behavior leads to increased charitable donations a prosocial outcome This effect is driven by subjective feelings of empowerment that consumers derive from status consumption My second essay investigates inferences made about consumers who share word of mouth about their status products I demonstrate across 12 studies that word of mouth about status products decreases consumers perceived status in the eyes of other people This is because word of mouth about their status products reduces the perceived cultural capital of status consumers which in turn reduces the perception of status This is paradoxical since consumers share word of mouth about their status products with the intention to elevate their status in the eyes of others In the two essays I use both lab and field experiments to test my hypotheses employ both mediation and moderation methods to test the psychological processes rule out an array of alternative explanations and explore several boundary conditions I conclude the two essays by outlining their contributions to both theory and marketing practice **The Family** Robert O.
