## **Status Anxiety:**

*International Status Anxiety and Higher Education* Anatoly V. Oleksiyenko, Qiang Zha, Igor Chirikov, Jun Li, 2024-08-01 This volume provides a critical perspective on the Soviet legacy of global competition and status anxiety in international higher education. Investigating tensions generated by the traditional power instruments of coercion, money and attraction, the book looks into the dynamics of multi-level forces that either advance progressive university policies and practices or lead to hyper centralization, indoctrination and unfreedom of inquiry in higher education. The volume provides insights into political sources that champion the anxiety about superpower status over the agenda of social equality, fairness and freedom in universities and their communities. The manuscript offers an excellent collation of studies shedding light on the phenomenon of de-Sovietization which was previously largely overlooked and underexplored in the higher education literature. The book appeals to policy makers, practitioners and scholars of higher education who seek to understand historical and political conditions that affect the currency of Chinese and Russian scholarship. As de-Sovietization of higher education may often be aspiration than reality in the two post-totalitarian countries, this book offers a unique thought-provoking frame of analysis, urging for more studies in the area as well as encouraging enhanced responsibility in creating sufficient room for freedom of critical inquiry.

*Status Anxiety* Alain de Botton, 2005-01-13 THE SUNDAY TIMES TOP TEN BESTSELLER From one of our greatest voices in modern philosophy, author of *The Course of Love*, *The Consolations of Philosophy*, *Religion for Atheists* and *The School of Life*, Alain de Botton sets out to understand our universal fear of failure and how we might change it. De Botton's gift is to prompt us to think about how we live and how we might change things. *The Times* We all worry about what others think of us. We all long to succeed and fear failure. We all suffer to a greater or lesser degree, usually privately and with embarrassment, from status anxiety. Alain de Botton gives a name to this universal condition and sets out to investigate both its origins and possible solutions. He looks at history, philosophy, economics, art and politics and reveals the many ingenious ways that great minds have overcome their worries. The result is a book that is not only entertaining and thought-provoking but genuinely wise and helpful as well. He analyses modern society with great charm, learning and humour. His remedies come as a welcome relief when most books offering solutions to the stresses of life recommend the lotus position. *Daily Mail*

[George C. Wallace and the Politics of Powerlessness](#) Jody Carlson, 1981-01-01 This is the only

complete study of the Wallace phenomenon. It covers all of the presidential campaigns and views Wallace from a variety of vantage points. Historical context, content analysis of speeches and analysis of election data including voting statistics and attitudinal patterns of supporters. Politics of Powerlessness examines nationwide support for George C. Wallace in the presidential campaigns of 1964, 1968, 1972 and 1976. A number of election and candidate preference surveys are used as sources of data on supporters. An understanding of Wallace's appeal is provided through an examination of themes noted throughout his speeches and an analysis of his political history from biographical sources, personal interviews and newspaper accounts of the time. The picture of Wallace that emerges is one of a man who saw himself as a crusader for his supporters' interests while deliberately heightening and intensifying their feelings of powerlessness as a means of getting votes. Carlson shows that Wallace voters were not marginal. They did not reflect a loss of status nor were they simply outside the mainstream of political life. They were very much like major party voters with the exception of their feelings of political powerlessness that emerged by increased government participation in state politics. This work informed not only by a careful analysis but by interviews with Wallace many of his followers and people active in his campaigns. The work has the additional advantage of having follow up analyses and interviews as late as 1978. In this sense it represents not only a scholarly analysis of the Wallace phenomenon but the most up to date analysis as well.

**Data in Social Research** Geert Loosveldt, Marc Swyngedouw, 2007. This book serves a dual purpose. Firstly it aims to make social science researchers more aware of the substantive implications of various aspects of the measuring process in social science research. Secondly the book is also intended as a tribute to Jaak Billiet on the conclusion of his outstanding research career at the KU Leuven. In the book over 40 international scientists reflect on themes associated with this research: pillarisation, preference for the extreme right, measuring and explaining ethnocentrism, the validity and reliability of measurement instruments, methodological research into the quality of survey data with particular attention to non-response and the methodology of comparative research. Many articles emphasise the importance of the interaction between methodology and substantive results of social science research.
