Statutes On Environmental Law:

Selected Environmental Law Statutes United States, West Publishing Company, 1983 *Statutes on Environmental Law*
Richard L. Revesz, 2002-07 Selected Environmental Law Statutes West Publishing Company Editorial, 1989

Introduction to Environmental Law and Policy Christina M. Valente, William D. Valente, 1995 **A Guide to U.S.**

Environmental Law Arden Rowell, Josephine van Zeben, 2021-02-23 Written by two internationally respected authors this unique primer distills the environmental law and policy of the United States into a practical guide for a nonlegal audience as well as for lawyers trained in other regions. The first part of the book explains the basics of the American legal system, key actors, types of laws, and overarching legal strategies for environmental management. The second part delves into specific environmental issues: pollution, ecosystem management, and climate change, and how American law addresses each. Chapters include summaries of key concepts, discussion questions, and a glossary of terms, as well as informative spotlights, brief overviews of topics. With a highly accessible structure and useful illustrative features, *A Guide to U.S. Environmental Law* is a long-overdue synthetic reference on environmental law for students and for those who work in environmental policy or environmental science. Pairing this book with its companion, *A Guide to EU Environmental Law*, allows for a comparative look at how two of the most important jurisdictions in the world deal with key environmental problems.

Selected

Environmental Law Statutes United States, 2001 Environmental Regulation Robert V. Percival, 2003 This comprehensive yet highly accessible casebook earned its loyal following by exploring and explaining both environmental regulations and the policy considerations that shape them. In its Fourth Edition, *Environmental Regulation* Law, Science, and Policy also presents a wide range of new material to reflect significant developments in the area. The casebook provides a smooth introduction to the complex web of environmental law: twelve self-contained chapters supply comprehensive coverage while giving instructors flexibility in organizing their courses. The detailed policy examination focuses not only on the substance of environmental statutes but also on how they are translated into regulations and how they influence real world behavior. Effective teaching and study guides appear throughout the book, including charts and diagrams mapping the structure of each of the major environmental statutes, realistic problems and questions, pathfinders explaining where to find crucial source materials for every major subject area, an extensive glossary and a list of acronyms. This clear text is written with the nonspecialist in mind; a Teacher's Manual provides detailed suggestions for class use and a website (www.law.umaryland.edu/environment). The casebook enables students to learn more about topics of particular interest and to keep up to date on current developments in the field. An annual Statutory Supplement and Internet Guide keep the book current. ENVIRONMENTAL REGULATION Law, Science, and Policy has been scrupulously updated to reflect the many significant changes in the law between editions. Significant new Supreme Court cases, including *Whitman v. American Trucking Association*, *Inc. Solid Waste Agency of Northern Cook County v. United States Army Corps of Engineers*, *Palazzolo v. Rhode Island*,

Island and Sierra Tahoe Preservation Council v Tahoe Regional Planning Agency the first use of the Congressional Review Act to veto agency regulations the Bush administration's use of regulatory review and an update on the effects of the Oil Pollution Act in preventing oil spills and trends in judicial review of agency action significant changes to Superfund liability from the Superfund Recycling Equity Act and the Small Business Liability Relief and Brownfields Revitalization Act the latest developments in EPA's long running saga concerning the definition of solid waste new problem exercises on the risks of transporting and storing high level nuclear waste in a central repository in Yucca Mountain Nevada on the controversy over regulation of arsenic in drinking water and on establishing total maximum daily loadings to control non point source pollution This timely revision offers current coverage in a proven effective format Be sure to review Environmental Regulation Law Science and Policy Fourth Edition before you choose materials for your next course

Compendium of South

African Environmental Legislation Morné Van der Linde, 2006 Environmental law is a broad and interdisciplinary branch of law within the South African legal system The promulgation of the 1996 Constitution of the Republic of South Africa provided for the potential acceleration of the development of South African environmental law jurisprudence The

Constitution grants every person the right to an environment that is not harmful to their health or well being as well as the right to have the environment protected through reasonable legislative and other measures that prevent pollution ecological degradation promote conservation and secure ecological sustainable development and the use of natural resources while promoting justifiable economic and social development Environmental law deals with a large number of legal problems at the domestic level i.e. South Africa the regional level i.e. African Union the sub regional level i.e. Southern African Development Community as well as at an international level i.e. United Nations At the domestic level environmental law draws on all the formal sources of law including legislation common law principles customary law indigenous law and international environmental law The bulk of South African environmental law and principles are regulated by legislation at national level The most important environmental legislative measures at a national level include the 1996 South African Constitution and the National Environmental Management Act NEMA of 1998 Other additional environmental legislation in South Africa deal with issues such as conservation pollution atmospheric land marine noise water and waste management energy and energy resources Comment Don Centre for Human Rights
