Towards a Competence-Based View on Models and Modeling in Science Education Annette Upmeier zu Belzen,Dirk Krüger,Jan van Driel,2021-08-26 The book takes a closer look at the theoretical and empirical basis for a

competence based view of models and modeling in science learning and science education research. Current thinking about models and modeling is reflected. The focus lies on the development of modeling competence in science education and on philosophical aspects including perspectives on nature of science. The book explores, interprets and discusses models and modeling from the perspective of different theoretical frameworks and empirical results. The extent to which these frameworks can be integrated into a competence based approach for science education is discussed. In addition, the book provides practical guidance by outlining evidence based approaches to diagnosing and promoting modeling competence. The aim is to convey a strong understanding of models and modeling for professions such as teacher educators, science education researchers, teachers and scientists. Different methods for the diagnosis and assessment of modeling competence are presented and discussed with regard to their potential and limitations. The book provides evidence based ideas about how teachers can be supported in teaching with models and modeling, implementing a competence based approach and thus how students can develop their modeling competence. Based on the findings, research challenges for the future are identified.

Sessional Papers Ontario. Legislative Assembly, 1883 **Social Capital** Gregory Tripp, Michael Payne, 2009

Social capital may be defined as social networks, the norms of reciprocity and trust that arise from them and the application of these assets in achieving mutual objectives. Social capital is quite important for the efficient performance of modern economies and for the development of a stable liberal democracy. The creation of networks and trust ideas central to mainstream thinking about social capital seem to be fundamental in allowing change to occur smoothly. This book proposes certain designs that appear to encourage the social interactions of sense of belonging that lie at the heart of the idea about social capital. The role of social capital in the strategic organisation of family businesses are also explored. While managers at other firms and government bureaucratic officials have a positive and monotonic relationship with performance, that for social capital from politicians has a negative relationship with performance for non family businesses.
