The Flood:

The Flood Maggie Gee, 2012-04-18 President Bliss is handling a tricky situation with customary brio but after months of ceaseless rain the city is sinking under the floods The rich are safe on high ground but the poor are getting damper in their packed tower blocks and the fanatical Last Days sect is recruiting thousands When at last the sun breaks through the clouds Lottie heads off to the opera husband Harold listens to jazz and their ditsy teenage daughter Lola fights capitalism by bunking off school Shirley takes her twin boys to the zoo The government eager to detract attention from a foreign war it has waged announces a spectacular City Gala But not even TV astrologer Davey Lucas can predict the extraordinary climax that ensues

An Historical and Standing Structure Study of the Flood Control Project at Portage, Columbia County, Wisconsin Joyce McKay, 1981 Completed during October 1981 the historical and standing structure study of the flood control project in Portage Wisconsin surveyed structures and sites in the First Ward and below the 800 foot contour level between Cook and the Portage Canal on the northwest the Chicago Milwaukee St Paul and Pacific Railroad on the north and MacFarland Road on the west The level of investigation was a phase I or reconnaissance survey intended to identify those structures and sites which might be potentially eligible for the National Register of Historic Places At this stage of the investigation a fairly detailed literature search provided a local and regional context with which to judge site significance Because the overall flood control project would affect sites favorably i e protect them from flood damage it was concluded that any of the three project alternatives the rebuilding of a levee the construction of ring levees or waterproofing individual structures whichever gave more protection should be selected Each alternative could require some site mitigation And in fact mitigation projects recommended in the report might in the end enhance the site involved

The Flood Charles Tomlinson, 1981 Coping with Floods Giuseppe Rossi, Nilgun B. Harmanciogamalu, V. Yevjevich, 2012-12-06 Floods are natural hazards whose effects can deeply affect the economic and environmental equilibria of a region Quality of life of people living in areas close to rivers depends on both the risk that a flood would occur and the reliability of flood forecast warning and control systems Tools for forecasting and mitigating floods have been developed through research in the recent past Two innovations currently influence flood hazard mitigation after many decades of lack of significant progress they are the development of new technologies for real time flood forecast and warning based on weather radars and satellites and a shift from structural to non structural flood control measures due to increased awareness of the importance of protecting the

environment and the adverse impacts of hydraulic works on it This book is a review of research progress booked in the improvements of forecast capability and the control of floods Mostly the book presents the results of recent research in hydrology modern techniques of real time forecast and warning and ways of controlling floods for smaller impacts on the environment A number of case studies of floods in different geographical areas are also presented Scientists and specialists working in fields of hydrology environmental protection and hydraulic engineering will appreciate this book for its theoretical and practical content *The Færoe islands pilot* Admiralty hydrogr. dept, Great Britain.
