Interpreting Chinese Philosophy Jana S. Rošker, 2021-05-06 Understanding Chinese philosophy requires knowledge of the referential framework prevailing in Chinese intellectual traditions But Chinese philosophical texts are frequently approached

through the lens of Western paradigms Analysing the most common misconceptions surrounding Western Sinology Jana Ro ker alerts us to unseen dangers and introduces us to a new more effective way of reading Chinese philosophy Acknowledging that different cultures produce different reference points Ro ker explains what happens when we use rational analysis a major feature of the European intellectual tradition to read Chinese philosophy We rely on impossible comparisons arrive at prejudiced assumptions and fail to arrive at the truth the consequence of applying a different methodology to the process of perceiving understanding and interpreting reality Instead of transferring concepts and categories from Western sinology onto socio cultural Chinese contexts Ro ker constructs a new methodology of reading understanding and interpreting Chinese philosophy She opens our eyes to the basic problems of Western paradigms encourages intercultural approaches and allows us to master a more autochthonous understanding of Chinese philosophy

*Copyright and the Public Interest in China* G. H. Tang,2011 This brilliant amalgam of law history social analysis and some Confucian philosophy argues for a distinctive Chinese approach to copyright and the public interest aligning not only the Western commitment to individual creativity but also supporting public access to and use of works without the consent of the copyright holder The argument involves fascinating analysis not only of evolving Chinese attitudes to education libraries archives and censorship but also of the profound significance of the Internet in China today Hector MacQueen University of Edinburgh UK Guan Hong Tang s book offers a fresh insightful and scholarly treatment of the relationship between the law of copyright and the public interest in China Copyright legislation in China is a novelty dating from 1990 and Dr Tang provides a vivid overview of the historical and cultural tensions between traditional Chinese Confucianism and the very concept of copyright tensions which more recent legislation and case law seek to address Gillian Davies Hogarth Chambers UK Guan Hong Tang expertly highlights how the multidimensional concept of public interest has influenced the development and limitations of Chinese copyright Since 1990 China has awarded copyright individual rights but also provides for public non criminal enforcement The author reveals that pressures of development globalisation and participation in a world economy have hastened the loss of public interest from copyright However for a socialist country placing the common ahead of the individual interest the public interest also constitutes a phenomenological tool with which to limit copyright The author also discusses how the rise of the Internet which has had a major social and economic impact on China raises problems for

*Philosophical Enactment and Bodily Cultivation in Early Daoism* Thomas Michael, 2021-08-12 In *Philosophical Enactment and Bodily Cultivation in Early Daoism* Thomas Michael illuminates the formative early history of the Daodejing and the social political religious and philosophical trends that indelibly marked it This book centers on the matrix of the Daodejing that harbors a penetrating phenomenology of the Dao together with a rigorous system of bodily cultivation It traces the historical journey of the text from its earliest oral circulations to its later transcriptions seen in a growing collection of ancient Chinese excavated manuscripts It examines the ways in which Huang Lao thinkers from the Han Dynasty transformed the original phenomenology of the Daodejing into a metaphysics that reconfigured its original matrix and it explores the success of the Wei Jin Daoist Ge Hong in bringing the matrix back into its original alignment This book is an important contribution to cross cultural studies bringing contemporary Chinese scholarship on Daoism into direct conversation with Western scholarship on Daoism The book also concludes with a discussion of Martin Heidegger's recognition of the position and value of the Daodejing for the future of comparative philosophy *A History of Chinese*
