Liddell,2003-03-13 In sign languages of the deaf some signs

can meaningfully point toward things or can be meaningfully placed in the space ahead of the signer. This obligatory part of fluent grammatical signing has no parallel in vocally produced languages. This book focuses on American Sign Language to examine the grammatical and conceptual purposes served by these directional signs. It guides the reader through ASL grammar, the different categories of directional signs, the types of spatial representations signs are directed toward how such spatial conceptions can be represented in mental space theory and the conceptual purposes served by these signs. The book demonstrates a remarkable integration of grammar and gesture in the service of constructing meaning. These results also suggest that our concept of language has been much too narrow and that a more comprehensive look at vocally produced languages will reveal the same integration of gestural gradient and symbolic elements. Besant, 2015-07-10. Excerpt from The Fourth Generation. It is perhaps well to explain that this story first appeared as a serial early in 1899 that on revision it was found desirable partly to rewrite certain chapters and to enlarge upon certain points. The structure of the story, the characters and the situations remain unaltered. The question with which the story deals is not fully answered. It is one of those questions which can never be answered from time to time every man must ask himself why the innocent must suffer and do suffer every day and in every generation for the follies and the sins of their forefathers. Every man must find his own answer or must acknowledge sorrowfully that he can find none. I venture to offer in these pages an answer that satisfies myself. It substitutes consequence for punishment and puts effect that follows cause in place of penalties. And as I hope is made plain it seems to me that I have no less an authority for this view than the greatest of the Prophets of Israel.
