Dialectical Materialism Zedong Mao, Nick Knight, 2016-09-16 New and annotated translations of philosophical essays written by Mao Zedong in 1937 which have come to be regarded as a cornerstone in the development of Chinese Marxism The editor analyzes their textual philosophical and historical significance **Monthly Review** John Bellamy Foster, Harry Magdoff, Ellen Meiksins Wood, Robert Waterman McChesney, 1983-05 **Reclaiming the Land** Sam Moyo, Paris Yeros, 2013-07-04 Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism From Brazil and Mexico to Zimbabwe and the Philippines rural movements of diverse political character but all sharing the same social basis of dispossessed peasants and unemployed workers have used land occupations and other tactics to confront the neoliberal state This volume brings together for the first time across three continents Africa Latin America and Asia an intellectually consistent set of original investigations into this new generation of rural social movements These country studies seek to identify their social composition strategies tactics and ideologies to assess their relations with other social actors including political parties urban social movements and international aid agencies and other institutions and to examine their most common tactic the land occupation its origins pace and patterns as well as the responses of governments and landowners At a more fundamental level this volume explores the ways in which two decades of neoliberal policy including new land tenure arrangements intended to hasten the commodification of land and new land uses linked to global markets have undermined the social reproduction of the rural labour force and created the conditions for popular resistance The volume demonstrates the longer term potential impact of these movements In economic terms they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis And in political terms breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development
