## **The Game Of Life College Sports And Educational Values:**

*The Game of Life* James L. Shulman, William G. Bowen, 2011-08-15 The President of Williams College faces a firestorm for not allowing the women's lacrosse team to postpone exams to attend the playoffs The University of Michigan loses 28 million on athletics despite averaging 110 000 fans at each home football game Schools across the country struggle with the tradeoffs involved with recruiting athletes and updating facilities for dozens of varsity sports Does increasing intensification of college sports support or detract from higher education's core mission James Shulman and William Bowen introduce facts into a terrain overrun by emotions and enduring myths Using the same database that informed *The Shape of the River* the authors analyze data on 90 000 students who attended thirty selective colleges and universities in the 1950s 1970s and 1990s Drawing also on historical research and new information on giving and spending the authors demonstrate how athletics influence the class composition and campus ethos of selective schools as well as the messages that these institutions send to prospective students their parents and society at large Shulman and Bowen show that athletic programs raise even more difficult questions of educational policy for small private colleges and highly selective universities than they do for big time scholarship granting schools They discover that today's athletes more so than their predecessors enter college less academically well prepared and with different goals and values than their classmates differences that lead to different lives They reveal that gender equity efforts have wrought large sometimes unanticipated changes And they show that the alumni appetite for winning teams is not as schools often assume insatiable If a culprit emerges it is the unquestioned spread of a changed athletic culture through the emulation of highly publicized teams by low profile sports of men's programs by women's and of athletic powerhouses by small colleges Shulman and Bowen celebrate the benefits of collegiate sports while identifying the subtle ways in which athletic intensification can pull even prestigious institutions from their missions By examining how athletes and other graduates view *The Game of Life* and how colleges shape society's view of what its rules should be Bowen and Shulman go far beyond sports They tell us about higher education today the ways in which colleges set policies reinforce or neglect their core mission and send signals about what matters Sport, Power, and Society Robert E. Washington, David Karen, 2018-04-19 This comprehensive collection examines the culture of sport and its relationship with various social institutions The editors first provide a broad overview of the field and describe the ways in which the concept of sport as a meritocratic contest is undermined by the powerful social structures within which it is embedded Sections focus on political economy violence the media education politics fans and community and the body Primary readings from noted scholars in each section address current issues such as the presence of big time sports in educational institutions the effects of corporate media race and class relations professional athletes ties to politics and how sports alter perceptions and practices regarding beauty and health In addition entertaining and provocative essays from journalists supplement academic readings and spotlight key issues Section introductions from the editors connect the readings to a theoretical framework that

explores the perspectives of new institutionalism cultural hegemony social capital and symbolic interaction and cultural construction Providing a cohesive foundation for a wide range of readings Sport Power and Society is a must have resource for understanding the current issues and debates surrounding the interactions of sport and society **Sport and Religion**

**in the Twenty-First Century** Brad Schultz, Mary L. Sheffer, 2015-12-16 This book examines the relationship between sport and religion with regard to twenty first century topics such as race fandom education and culture The contributors provide new insights into the people movements and events that define the complex relationship between sport and religion around the world A wonderful addition to any academic course on religion sports ethics or culture as a whole Special Admission

Kirsten Hextrum, 2021-08-13 Honorable Mention 2022 Society of Professors of Education Outstanding Book Award Special Admission contradicts the national belief that college sports provide upward mobility opportunities Kirsten Hextrum documents how white middle class youth become overrepresented on college teams Her institutional ethnography of one elite athletic and academic institution includes over 100 hours of interviews with college rowers and track field athletes She charts the historic and contemporary relationships between colleges athletics and white middle class communities that ensure white suburban youth are advantaged in special athletic admissions Suburban youth start ahead in college admissions because athletic merit the competencies desired by university recruiters requires access to vast familial communal and economic resources all of which are concentrated in their neighborhoods Their advantages increase as youth parents and coaches strategically invest in and engineer novel opportunities to maintain their race and class status Thus college sports allow white middle class athletes to accelerate their racial and economic advantages through admission to elite universities

Bowen, Sarah A. Levin, 2011-06-27 In Reclaiming the Game William Bowen and Sarah Levin disentangle the admissions and academic experiences of recruited athletes walk on athletes and other students In a field overwhelmed by reliance on anecdotes the factual findings are striking and sobering Anyone

seriously concerned about higher education will find it hard to wish away the evidence that athletic recruitment is problematic even at those schools that do not offer athletic scholarships Thanks to an expansion of the College and Beyond database that resulted in the highly influential studies *The Shape of the River* and *The Game of Life* the authors are able to analyze in great detail the backgrounds academic qualifications and college outcomes of athletes and their classmates at thirty three academically selective colleges and universities that do not offer athletic scholarships They show that recruited athletes at these schools are as much as four times more likely to gain admission than are other applicants with similar academic credentials The data also demonstrate that the typical recruit is substantially more likely to end up in the bottom third of the college class than is either the typical walk on or the student who does not play college sports Even more troubling is the dramatic evidence that recruited athletes underperform they do even less well academically than predicted by their test scores and high school grades Over the last four decades the athletic academic divide on elite campuses has widened substantially This book examines the forces that have been driving this process and presents concrete proposals for reform At its core *Reclaiming the Game* is an argument for re establishing athletics as a means of fulfilling instead of undermining the educational missions of our colleges and universities
