## **The World Needs Your Art**

Danielle E. Fournier,2017-03-21 The World Needs Your Art and only you can make it Ever wondered why you just HAVE to make something anything or you will just burst Artists are born not made And if you yearn to create that makes you an artist no matter your medium Photography painting performance art writing singing or fashion all are forms of expression of the creative soul Often creative people are not encouraged to pursue their heart s desires by the world at large They end up frustrated depressed or sad because they feel they cannot share their gifts with the world They get blocked give up too soon or worse yet fail to ever start what they yearn to make And that s a downright shame The World Needs Your Art is a friendly guide to unlocking unlimited creativity while developing your style and learning to never be blocked for very long again by tapping into that innate gift called imagination

*The Flow Brain State of Painting and Drawing Artists* Ariana Van Heerden,2014 The aim of this study was to investigate whether there is an association between art making and the brain state known as flow a construct defined by Mihaly Csikszentmihalyi Links were sought between artists perceived propensity to experience flow and quantified experimental data of the same art making events A predominantly psychological theoretical framework had to be created contextual as well as conceptual of historical and contemporary leanings that have formulated understandings of creativity and flow These indicate that flow can trace its origins to concepts of human happiness and excellence motivation self determination and peak experiences These concepts illustrate that in pursuing intrinsic

endeavours such as art making a person is continuously engaged in reflectivity and deliberation concerning his or her actions and aims which tend to be self motivated or autotelic In this study the autotelic and self reflecting leanings of art making were found to be germane to flow A key aspect for understanding the flow experience is Arne Dietrich s hypothesis of transient hypofrontality described as enabling the temporary suppression of the analytical and meta conscious capacities of the explicit system In this study transient hypofrontality was found to be germane to interpretations of flow and art making
