The Flower Of The Intellect:

Platonism and Forms of Intelligence John Dillon, Marie-Elise Zovko, 2012-10-31 The volume contains a collection of papers presented at the International Symposium which took place in Hvar Croatia in 2006. In recent years there has been an upsurge of interest in the study of Plato Platonism and Neoplatonism. Taking the position that it is of vital importance to establish an ongoing dialogue among scientists artists academics theologians and philosophers concerning pressing issues of common interest to humankind this collection of papers endeavours to bridge the gap between contemporary research in Platonist philosophy and other fields where insights gained from the study of Plato and Platonist philosophy can be of consequence and benefit. Authors Werner Beierwaltes, Luc Brisson, Amber Carpenter, John Dillon, Jonathan Doner, Franco Ferrari, Francesco Fronterotta, F A J de Haas, Aaron Hughes, Byron Kaldis, Daniel Kolak, Thomas Leinkauf, Dionysis Mentzeniotis, Jean Marc Narbonne, Giannis Stamatellos, Vladimir Stoupel, Patrick Quinn, Jure Zovko and Marie lize Zovko.

Dionysius the Areopagite and the Neoplatonist Tradition Sarah Klitenic Wear, John M. Dillon, 2007-01-01 Dionysius the Areopagite is arguably one of the most mysterious and intriguing figures to emerge from the late antique world. Writing around 500 CE and possibly connected with the circle of Severus of Antioch, Dionysius manipulates a Platonic metaphysics to describe a hierarchical universe. As with the Hellenic Platonists he arranges the celestial and material cosmos into a series of triadic strata. These strata emanate from one unified being and contain beings that range from superior to inferior depending on their proximity to God. This metaphysics lends itself to a sacramental system similar to that of the Hellenic ritual theurgy which allows humans to reach the divine by examining the divine as it exists in creation. This book discusses the Christian Platonist's adaptation of Hellenic metaphysics language and religious ritual. Dionysius is shown to clearly work within the Hellenic tradition yet innovatively integrates Hellenic and Christian thought.

Proclus Radek Chlup, 2012-04-26 Proclus of Lycia (412-485) was one of the greatest philosophers of antiquity producing the most systematic version of late Neoplatonic thought. He exercised enormous influence on Byzantine, medieval, Renaissance and German Classical philosophy ranking among the top five of ancient philosophers in terms of the number of preserved works. Despite this he is rarely studied now the enormous intricacy of his system making the reading of his treatises difficult for beginners. This book provides the first comprehensive introduction to all the basic areas of Proclus' thought. It carefully guides the reader through his metaphysics, theology, epistemology and theory of evil as well as his sophisticated philosophy of religion. It also sets Proclus in the historical, social and religious context of late antiquity offering a synthetic account that will appeal to historians and students of ancient religion.
