Article 234 and Competition Law Barry J. Rodger,2008-03-13 It is a truism that almost all the major principles established by the ECJ have been decided in the context of a reference to that court for a preliminary ruling under Article 234 ex 177 EC Article 234 facilitates a dialogue between the national courts and the ECJ in order to allow national courts to seek guidance on the appropriate interpretation of Community law principles in a particular legal dispute From a Community perspective this process should enhance the uniform and consistent interpretation of Community law throughout the national courts This book adds to a growing body of literature on the ECJ's role in developing Community law and comprises quantitative and qualitative aspects It is based on collaborative research involving 14 Member States which focused on the Article 234 procedure in relation to competition law and State aid cases Rapporteurs were appointed in each Member State from which any Article 177 234 references had been made in relation to competition law or State aid The results presented here follow up competition law related Article 234 rulings to their domestic legal context to ascertain what happened in the subsequent legal phase when parties seek to enforce their rights or rely on other party's obligations on the basis of the ruling by the ECJ Each national report is built on a questionnaire seeking information on a range of issues relative to every competition law related ruling by the ECJ in references from that Member State's courts including the following the number of rulings in relation to that

Member State the dates of all rulings details of the case background reference questions and the ECJ ruling for each case and information where available on each post ruling process The research is comprehensive in reviewing all competition law related rulings to 1 May 2004 and pioneering as being the first systematic attempt to collate detailed information on all relevant cases including crucially the post ruling process This research is an important contribution to the literature on the ECJ and its role in developing a competition culture across the Community Moreover the importance of ensuring consistency and uniformity in the implementation of EC competition law by national courts has been given added significance following the accession of new Member States In light of these factors this book will serve as a reliable groundwork for further studies of the development of European integration particularly as it focuses on competition law an area of ever increasing significance and importance It is also of distinctive value to practitioners seeking precedents or juridical context on which to build arguments in European competition law

Sixty Years of EU State Aid Law and Policy Eugene Stuart, Iana Roginska-Green, 2016-04-24 If an EU industrial policy can be said to exist its contours may be found in the complex and evolving concept of State aid Because approaching any State aid issue can be fraught with multiple and sometimes conflicting interpretations an in depth analysis of the rationales initiatives and regulations that constitute the State aid system is much needed In response to this need this book provides a fine grained clarifying context through which recent reforms policy shifts and judicial decisions concerning State aid can be understood and applied to specific situations Focusing on the impacts of landmark cases and policy developments leading up to a deeply informed critique of the current State Aid Modernisation Programme the authors cover such issues and topics as the following linkages to other established and evolving EU common policies and common strategies effect of EU State aid rules in the expanding geopolitical regions of EU influence interaction with the WTO Subsidies and Countervailing Measures Agreement the problem of a subsidies culture how the European Commission's notion of bad State aid has evolved effect of EU policy imperatives e g environmental goals which implicitly argue for increased subsidisation nexus with EU tax harmonisation competition among undertakings versus competition among Member State policies and nature of the quasi devolution of regulatory responsibilities to EU Member
