Linking the fields of urban development, higher education and urban design, Global Universities and Urban Development covers universities and communities around the world, including Germany, Korea, Scotland, Japan, Mexico, South Africa, Finland and 13 countries in Asia. The book features contributions from noted urban scholars, campus planners and architects and university administrators from all the countries represented. A concluding chapter by the editors offers practical evaluations of the many cases and identifies best practices in the field. National Union Catalog, 1983. Includes entries for maps and atlases.

Contemporary Issues in Australian Urban and Regional Planning Julie Brunner, John Glasson, 2015-05-15. Contemporary Issues in Australian Urban and Regional Planning looks at a wide range of planning issues in Australia from the city to the regional scale, covering key topics in sustainable development and planning, including economic, social, environmental and governance perspectives. It also covers issues of climate change, population and urbanization trends, economic competitiveness and the Quadruple Bottom Line (QBL) Sustainability agenda. The book is organized around three key elements: Pressures and Principles of development and planning for sustainability; Planning Practice and Processes focused on essential topics including cities, regions, rural areas and social and environmental issues; and Future Processes and Prospects for planning practice and education, covering the fundamental issues of assessing sustainability, managing risk, effective participation and evolving approaches to planning education.
