

# The Future of General Practice In The UK

General practice, often referred to as primary care, plays a crucial role in the healthcare system of the United Kingdom. General practitioners (GPs) are the first point of contact for most patients and provide comprehensive, continuous, and coordinated healthcare services. As we look to the future, several key factors are likely to shape the landscape of general practice in the UK. This essay explores the evolving nature of general practice and discusses the potential challenges and opportunities that lie ahead.

## Technological Advancements

Advancements in technology are revolutionising healthcare delivery, and general practice is no exception. The future of general practice in the UK will witness the integration of digital health solutions. Electronic health records, telemedicine, wearable devices, and artificial intelligence-enabled diagnostics will improve efficiency, patient access, and overall quality of care. These technologies will facilitate remote consultations, real-time monitoring of patients' health, and timely interventions, leading to better patient outcomes.

## Population Health Management

**General Practice Revisited** Ann Cartwright, Robert Anderson, 2024-04-01 This study of general practice and the attitudes of patients and general practitioners to it is the most significant book yet written about the NHS This was how the reviewer in the British Medical Journal reviewed Ann Cartwright's earlier book *Patients and their Doctors In General Practice Revisited* originally published in 1981 Ann Cartwright and Robert Anderson compare the experiences and views described in the first study carried out in 1964 with those revealed by a second survey in 1977 In the intervening period there were a great many changes in the organization of general practice For example appointment systems and nurses working in the surgery became the rule rather than the exception and the number of doctors working in health centres or using deputizing services rose dramatically This study shows how the basic patient doctor relationship has been affected by these changes A fundamental feature of the survey is the demonstration that the attitudes and practices of patients and doctors are linked and that it is possible to relate the experiences and degree of satisfaction of patients to the doctor's age sex size of practice equipment ancillary help and indeed to the doctor's views and habits By bringing the picture of general practice up to date Ann Cartwright and Robert Anderson provided the basic data for any discussion of primary health care in this country at the time
