Challenges for Next Generation Network Operations and Service Management Yan Ma, Deokjai Choi, Shingo Ata, 2008-10-16
We are delighted to present the proceedings of the 11 Asia Pacific Network Operations and Management Symposium APNOMS 2008 which was held in Beijing China during October 22-24, 2008. The Organizing Committee selected the theme of this year's symposium as Challenges for Next Generation Network Operations and Service Management. Research and development on next generation networks NGNs have been carried out over the last few years and we are already seeing their deployment and operations in many parts of Asia Pacific countries. We are also beginning to experience new and interesting services that utilize these NGNs. We are certain that we will see more deployment of NGNs and NGN services in the next few years. Thus the operations and management of NGNs and their services are very important to the network operators and service providers. At the same time they are also concerned about new and more effective ways of performing the operations and management. This year the APNOMS call for papers received 195 paper submissions from 19 different countries including countries outside the Asia Pacific region: Europe, Middle East, North and South America. Each paper was carefully reviewed by at least three international experts. Based on review scores the APNOMS 2008 Technical Program Committee discussed the selection of papers and selected 43 high quality papers: 22 (1% of submissions) as full papers and 34 papers as short papers. Accepted papers were arranged into ten technical sessions and two short paper sessions for poster presentation.
