The Private Lives of Albert Einstein J. Roger L. Highfield, Paul Carte, 1993 In the Shadow of Greatness Michael Menager, 2020-09-01 In this unusual biography Michael Menager coaxes from the shadows of history the women who devoted themselves to the greatness of a genius in their lives At times the book reads like a love story at other times an adventure but throughout their five lives intertwine to tell one story of selfless devotion and a greatness that doesn't crave recognition This book covers the lives and works of Maria Nys wife of Aldous Huxley Françoise Gilot mistress of Pablo Picasso Vera Nabokov wife of Vladimir Nabokov Helen Dukas secretary to Albert Einstein and Isabel Burton wife and partner of Sir Richard Burton

God, the Science, the Evidence Michel-Yves Bolloré, Olivier Bonnassies, 2025-10-14 After four years of research in partnership with over twenty scientists and esteemed experts this book explores one of the most significant questions we face the existence or non existence of a creator God For more than four centuries the scientific discoveries of Copernicus Galileo Darwin and Freud created the impression that we could explain the workings of the Universe without the idea of a creator God By the beginning of the twentieth century materialism had become the dominant theory of the time And yet with unexpected and astonishing force the pendulum of science has swung back in the other direction owing to a rapid succession of discoveries the theory of relativity quantum mechanics the Big Bang the theories of expansion heat death and fine tuning of the universe This newly acquired knowledge has upended the certainties of the twentieth century collective consciousness Once the only acceptable theory materialism is increasingly considered an irrational belief The authors of this highly readable book retrace the fascinating history of these scientific breakthroughs and offer a rigorous overview of the new proof of the existence of God

God the Science and the Evidence is an invitation to reflect and debate the place of God in science

The Sexual Paradox Susan Pinker, 2008-03-11 Susan Pinker psychologist and award winning columnist has written a groundbreaking and controversial book that reveals why learning and behavioral gaps between boys and girls in the classroom are reversed in the workplace Pinker examines how fundamental sex differences play out over the life span By comparing fragile boys who succeed later with high achieving women who opt out or plateau in their careers Pinker turns several assumptions upside down that women and men are biologically equivalent that intelligence is all it takes to succeed and that women are just versions of men with identical interests and goals In lively prose Pinker guides readers through the latest findings in neuroscience and economics while addressing these questions Are males the more fragile sex What do men with Asperger syndrome or dyslexia

tell us about more average men Which sex is the happiest at work Why do some male college dropouts earn more than the bright girls who sat beside them in third grade After three decades of women's educational coups why do men outnumber women in corporate law engineering physical science and politics The answers to these questions are the opposite of what we expect A provocative examination of how and why learning and behavioral gaps in the nursery are reversed in the boardroom this illuminating book reveals how sex differences influence career choices and ambition Through the stories of real men and women science and examples from popular culture Susan Pinker takes a new look at the differences between women and men
