

# THE HUMAN BODY

## HUMAN BODY CHART 25

### ALL IN ONE

The human body is everything that makes up, well, you. Made up of hundreds of bones, the skeletal system provides structure, support and movement to the human body. Veins carry blood to the heart and enter the heart through vena cava.

**BRAIN:** The control centre of the body regulates other organ systems, control sensory and motor functions.

**TEETH:** Cut, crush and tear food.

**LUNGS:** Supplies oxygen to the blood and removes  $\text{CO}_2$  from blood.

**HEART:** Pumps blood throughout the body.

**EYES:** Helps you see the world around you.

**NOSE:** Passage way for air that lets you smell things around you, and helps in breathing.

**EARS:** Helps you hear the world around you.

**TONGUE:** Helps detect and transmit taste signals to the brain. The tongue is vital for chewing and swallowing food, as well as for speech.

**BLOOD:** Transports oxygen and nutrients around the body and removes cellular waste, among a range of vital functions.

**THYROID:** Controls appetite and metabolism.

**SPLEEN:** Helps to filter out toxins in the blood.

**STOMACH:** Helps in breakage of food.

**INTESTINE:** Helps to digest the food.

**URINARY SYSTEM:** Removes wastes from blood, regulates concentration of body fluids.

**GALL BLADDER:** Collects bile from the liver, and discharges it into the small intestine, where it helps digest fat.

**SKIN:** Protects against injury, infection, and fluid loss; helps regulate body temperature and excretes water, as sweat.

**MUSCLES:** Work with the skeletal and nervous system to produce movement, also helps to circulate blood through the human body.

**PANCREAS:** It has two main functions: an exocrine function that helps in digestion and an endocrine function that regulates blood sugar.

**REPRODUCTIVE SYSTEM:** Functions to make new individuals by producing, storing and releasing specialised sex cells, known as gametes.

## Be My Human:

*The Human Origins* Valentin Matcas, 2016-04-20 There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity's lifespan and achievement defining its specific timeline While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates Since you want the accurate truth because you already know all theories beliefs speculations and debates regarding the human origins And this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity Additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model *Advanced Accounts Volume II, 19th Edition* Shukla M.C./ Grewal T.S. & Gupta S.C., Keeping in pace with the changing accounting practices this revised edition of Advanced Accounts Volume II provides a contemporary and comprehensive presentation of accounting concepts and applications *Schutzian Research* vol. 3 / 2011 Michael Barber, 2011-01-01

**Routledge Companion to Humanism and Literature** Michael Bryson, 2022-03-30 The Routledge Companion to Humanism and Literature provides readers with a comprehensive reassessment of the value of humanism in an intellectual landscape Offering contributions by leading international scholars this volume seeks to define literature as a core expressive form and an essential constitutive element of newly reformulated understandings of humanism While the value of humanism has recently been dominated by anti humanist and post humanist perspectives which focused on the flaws and exclusions of previous definitions of humanism this volume examines the human problems dilemmas fears and aspirations expressed in literature as a fundamentally humanist art form and activity Divided into three overarching categories this companion will explore the histories developments debates and contestations of humanism in literature and deliver fresh definitions of the new humanism for the humanities This focus aims to transcend the boundaries of a world in which human life is all too often

defined in terms of restrictions political economic theological intellectual and lived in terms of obedience conformity isolation and fear The Routledge Companion to Humanism and Literature will provide invaluable support to humanities students and scholars alike seeking to navigate the relevance and resilience of humanism across world cultures and literatures

chapter includes a section on Biomedical Importance and a summary of the topics covered. Review questions follow each of the eleven sections. Case studies in every chapter emphasize the clinical relevance to biochemistry. NEW coverage of toxic naturally occurring amino acids, extraterrestrial biomolecules, computer aided drug design, the role of complement cascade in bacterial and viral infection, secreted mediators of cell-cell signaling between leukocytes, the role of mast cells, basophils, and eosinophils, and the hazard of antioxidants that down regulate radical signaling for apoptosis and increase risk of cancer. Praised by medical students for its current and engaging style, Harper's Illustrated Biochemistry is an essential for USMLE review and the single best reference for learning the clinical relevance of any biochemistry topic.
