**Model Innovation** Marijan Topic, 2017-11-06 Master's Thesis from the year 2017 in the subject Business economics

Business Management Corporate Governance Friedrich Alexander University Erlangen Nuremberg language English

abstract The goal of this Master's thesis is to examine the relationship between managerial OR and business model

innovations BMIs in established organizations In order to meet the complexity of the topic this thesis is focused on factors

that hinder or help managers in recognizing business opportunities Focusing on incumbent firms this paper conducts further

research to identify the main influencing factors including challenges vulnerabilities and obstacles The thesis is divided into

six parts starting with a brief description of the research topic including the problem position and objective Second a

literature review is conducted to summarize the state of research including theoretical foundations In today's scientific

literature the two fields of research BMI OR are by no means treated independently from each other For the time being BMI

and OR are considered independently of each other It is then shown exactly how current literature treats managerial OR with

respect to BMI The results are then synthesized into a summary highlighting what is known and not known The areas of

controversy in the literature are identified and questions are formulated that need further research The third part of the

thesis consists of expert interviews Derived from the literature review a guideline for interviews is developed to treat the

research gaps in an appropriate way and to meet the complexity of the task setting The explorative survey aims to identify

the challenges and drivers of managerial OR in BMI and to identify approaches that have not yet been addressed in scientific literature to a significant extent The core of the analysis is the splitting of the BM into the elements value proposition value creation and value capture This ensures that all the facets of a company's BM are accurately addressed and form the basis for high quality results In order to cover a broad range the paper does not focus on a certain industry The interviews are conducted with an array of decision makers in organizations that have attempted or are currently attempting to innovate their BM at the business unit level or the corporate level Annual Report of the Railroad and Warehouse Commission of the State of Illinois Illinois. Railroad and Warehouse Commission, 1876 Brewery companies, a repr. from 'The Statist' of a series of articles furnishing full particulars and data concerning all brewery companies registered up to Nov. 1894.
