### **The French Oratorians And Absolutism 1611 1641:**

*The French Oratorians and Absolutism, 1611-1641* Charles E. Williams, 1989 This study is concerned with the evolving spirituality of the Congregation of the Oratory of Jesus under Pierre de Berulle and Charles de Condren in relation to the social and political environment of seventeenth century France The mentalite of the Congregation is shown to be principally that of sections of the clergy robe nobility officers bourgeois and professionals in opposition to the Jesuits and the emerging absolutist state

**Faalty and Fidelity: The Lazarists of Bourbon France, 1660-1736** Seán Alexander Smith, 2016-03-09 The career of the French saint Vincent de Paul has attracted the attention of hundreds of authors since his death in 1660 but the fate of his legacy entrusted to the body of priests called the Congregation of the Mission Lazarists remains vastly neglected De Paul spent a lifetime working for the reform of the clergy and the evangelization of the rural poor After his death his ethos was universally lauded as one of the most important elements in the regeneration of the French church but what happened to this ethos after he died This book provides a thorough examination of the major activities of de Paul s immediate followers It begins by analysing the unique model of religious life designed by de Paul a model created in contradistinction to more worldly clerical institutes above all the Society of Jesus Before he died de Paul made very clear that fidelity to this model demanded that his disciples avoid the corridors of power However this book follows the subsequent departures from this command to demonstrate that the Congregation became one of the most powerful orders in France The book includes a study of the termination of the little known Madagascar mission which was closed in 1671 This mission replete with colonial scandal and mismanagement revealed the terrible pressures on de Paul s followers in the decade after his demise The end of the mission occasioned the first major reassessment of the Congregation s goals as a missionary institute and involved abandoning some of the goals the founder had nourished The rest of the book reveals how the Lazarists recovered from the setbacks of Madagascar famously becoming parish priests of Louis XIV at Versailles in 1672 From then on fealty to Louis XIV gradually trumped fidelity to de Paul The book also investigates the darker side of the Congregation s novel alliance with the monarch by examining its treatment of Huguenot prisoners at Marseille later in the century and its involvement with the slave trade in the Indian Ocean This study is a wide ranging investigation of the Lazarists activities in the French Empire ultimately concluding that they eclipsed the Society of Jesus Finally it contributes new information to the literature on Louis XIV s prickly relationship with religious agents that will surprise historians working in this area

**The Divisions of French Catholicism, 1629-1645** Dr Anthony D Wright, 2013-07-28 For much of the sixteenth century France was wracked with religious strife as the Wars of Religion pitted Catholic against Protestant Whilst the conversion of Henri IV to Catholicism ended much of the conflict the ensuing peace highlighted the fractious nature of French Catholicism and the many competing threads that ran through it This book investigates the gradual division of the French Catholic reform movement often

associated with those known as the devots during the first half of the seventeenth century. Such division it is argued was emerging before the publication in France 1641 of the posthumous Augustinus of Jansenius not simply as a sequel to that. Those who were already distinguishing themselves from other devots before that date were thus not yet identifiable as Jansenists. Rather the initial defining sentiment was increasing French hostility towards Jesuit involvement in Catholic Reform both at home and abroad. Drawing on sources from the Jesuit archives in Rome and on Port Royal material in Paris the book begins with an investigation into the development of Catholic Reform in France showing the problems that emerged before 1629 and the degree to which these were or were not resolved. The second half of the book contrasts the fragmentation of the movement in the years beyond 1629 and the context of Richelieu's new directions in French foreign policy. Covering a crucial period in the lead up to the establishment of an absolute monarchy in France this book provides a rich new explanation of the development of French political and ecclesiastical history. It will be of interest not only to those studying the early modern period but to anyone wishing to understand the roots of French secular society.

*The Making of the French Episcopate, 1589-1661* Dr Joseph Bergin, Joseph Bergin, 1996-01-01 This major work written by one of the leading historians of France's ancien regime is the first in depth study of the French upper clergy during the key period of the Catholic Reformation following the Council of Trent. In describing the creation, character and role of these early French bishops it also sheds light on social mobility, education, the career patterns and prospects of particular groups, the workings of patronage and clientage networks and the wider dimensions of royal policy and patronage at this time. Joseph Bergin begins by analysing the structures of the French church and the process by which individuals were nominated and confirmed as bishops. He then presents a collective profile of these bishops in terms of their social and geographical origins, educational attainments and pre episcopal careers. Bergin examines royal patronage in relation to episcopal office, tracing the successive pressures with which the crown had to deal in the wider social and political world. In particular he shows how the crown painfully and gradually recovered control of church patronage after the low point of the religious wars, reducing the grip of the nobility on large numbers of dioceses. He also examines how reforming pressures were brought to bear on the crown to appoint bishops who met the standards of the counter reformation church and how the crown became increasingly in tune with these reformist pressures. He concludes by explaining particular features of the French episcopate within a wider European context. The book, the result of years of research in French and Italian archives, includes an extensive biographical dictionary that will make it an invaluable reference for all French historians of the period.

*The Time of Troubles in the Low Countries* Pasquier de Le Barre, Charlie R. Steen, 1989 The writings of Pasquier de le Barre describe the terrible results of the intrusion of Calvinist ideology and of Spanish absolutism into the life of the small province

of Tournai in the Low Countries between 1559 and 1567 The magistrates were challenged by Calvinists in their midst and by Philipp II from afar but both had the goal of remaking the government to new specifications The result was the destruction of the city and its government in a series of confrontations which le Barre described in personal but dispassionate terms His position as a magistrate made him a rare witness to these times     The End of Bastardy Matthew Dean Gerber,2004
