**Futurism and the Technological Imagination**, 2016-08-09 This volume *Futurism and the Technological Imagination* results from a conference of the International Society for the Study of European Ideas in Helsinki. It contains a number of re written conference contributions as well as several specially commissioned essays that address various aspects of the Futurists relationship to technology both on an ideological level and with regard to their artistic languages. In the early twentieth century many art movements vied with each other to overhaul the aesthetic and ideological foundations of arts and literature and to make them suitable vehicles of expression in the new Era of the Machine. Some of the most remarkable examples came from the Futurist movement founded in 1909 by Filippo Tommaso Marinetti. By addressing the full spectrum of Futurist attitudes to science and the machine world this collection of 14 essays offers a multifaceted account of the complex and often contradictory features of the Futurist technological imagination. The volume will appeal to anybody interested in the history of modern culture art and literature. [The Futurist](#), 2003 *The Futurist imagination* Yale University. Art Gallery, 1983

The book brings together many of the most influential works in abstraction's early history to draw a cross media portrait of this watershed moment in which traditional art was reinvented in a wholesale way. Works are presented in groups that serve as case studies each engaging a key topic in abstraction's first years an artist a movement an exhibition or thematic concern. Key focal points include Vasily Kandinsky's ambitious Compositions V VI and VII a selection of Piet Mondrian's work that offers a distilled narrative of his trajectory to Neo plasticism and all the extant Suprematist pictures that Kazimir Malevich showed in the landmark 0 10 exhibition in 1915. 0Exhibition MoMA New York USA 23 12 2012 15 4 2013
