they were so interested in water's failure to submerge the earth when their predecessors had not been. Analyzing biblical commentaries as well as natural philosophical, geographical and cosmographical texts from these periods, Lindsay Starkey shows that European sea voyages to the southern hemisphere combined with the traditional methods of European scholarship and religious reformations led sixteenth century Europeans to reinterpret water and earth's ontological and spatial relationships. The manner in which they did so also sheds light on how we can respond to our current water crisis before it is too late.
